

CONTENTS

	Page
C. ABEGG, H. BIPPES, F.P. BERTOLOTTI: On the application of suction for the stabilization of crossflow instability over perforated walls	1
R. ALEWELT: Impact of stringer-width on the effect of hybrid laminar flow with suction. .	8
V. BADER, F.-R. GROSCHE: Control of flow separation by dynamic excitation of the free shear layer	16
M. BAUMANN, D. STURZEBECHER, W. NITSCHKE: On active control of boundary layer instabilities on a wing	22
S. BECKER, F. DURST, H. LIENHART: In-flight boundary layer investigations on a laminar wing using Laser Doppler Anemometry	30
H. BIELER, R. ALEWELT: Effect of mean flow accuracy on PSE results	37
J. BIRKEMEYER: Adapted windtunnel walls for a swept wing experiment	44
R.C. BLASCHKE, D. HUMMEL: Experimental and numerical investigations on a waverider configuration in incompressible flow	52
G. BONFIGLI, M. KLOKER: Spatial Navier-Stokes simulation of crossflow-induced transition in a three-dimensional boundary layer	61
C. BREITSAMTER: Strake effects on the turbulent fin flowfield of a high-performance fighter aircraft	69
G. BRITTEN, J. BALLMANN: Numerical experiments about the uniqueness of aeroelastic solutions of elastic wings in transonic flow	77
O. BRODERSEN, E. MONSEN, A. RONZHEIMER, R. RUDNIK, C.-C. ROSSOW: Computation of aerodynamic coefficients for the DLR F-6 configuration using MEGAFLOW . .	85
U. BURGGRAF, M. KUNTZ, B. SCHÖNING: Implementation of the chimera method in the unstructured DLR finite volume code Tau	93
D. DELIMAR, M. SWOBODA, M. LÖTZERICH: Numerical analyses of an unsteady flow field in a compressor cascade with periodically changing inflow conditions	101
G. DIETZ, St. MÄHLMANN, St. HEIN: Entropy-layer instabilities in plane supersonic flow	108
E. ELSHOLZ, H. STEINMEYER, D. JOHN: Navier-Stokes solutions on wing-body-tail configurations and viscous mesh adaptation technique	116
R.H. ENGLER, Chr. KLEIN, P. MAY: Pressure sensitive paint application in low-speed flows	124

CONTENTS (continued)

	Page
P. ERB, B. EWALD, M. ROTH, C. TROPEA: „In-situ“ calibration procedure for surface-hotfilm-sensors based on a stagnation point flow	130
A. FEZER, M. KLOKER: Transition processes in Mach 6.8 boundary layers at varying temperature conditions investigated by spatial Direct Numerical Simulation	138
S.D. FONOV, R.H. ENGLER, Chr. KLEIN, S.V. MIHAILOV, V.E. MOSHAROV, V.P. KULESH, V.N. RADCHENKO, F. SCHAIRER: Investigations of the pressure fields on the oscillating wings by Pressure Sensitive Paint	146
M. FRANKE, T. RUNG, E. ELSHOLZ, P. AUMANN, F. THIELE: Numerical simulation of three-dimensional transonic flows using advanced turbulence-transport models ...	154
W. FRITZ: Numerical simulation of unsteady vortical flow about delta wings oscillating at high incidence	162
O. FROMMANN, D. FORBRICH: Aerodynamic optimization of airplane wings using analogy methods	170
Th. GERHOLD, J. EVANS: Efficient computation of 3D-flows for complex configurations with the DLR-Tau code using automatic adaptation	178
P. GIESE, R. HEINRICH, R. RADESPIEL: Numerical prediction of dynamic derivatives for lifting bodies with a Navier-Stokes solver	186
C. GMELIN, U. RIST, S. WAGNER: Investigations of active control of wave packets and comparable disturbances in a Blasius boundary layer by DNS	194
W. HAASE, E.H. HIRSCHL, J. KRAMMER, H. RIEGER: Multidisciplinary aerodynamic/structure dynamics high-performance simulation and optimization	202
P. R. HAKENESCH: Yaw control using asymmetric forebody strakes at high angles of attack	210
H. HANSEN, I. SZABO: Investigation of stall characteristics of an A3XX relevant airfoil up to high Reynolds numbers in the Technology Program HAK 2	218
R. HEINRICH, N. KALITZIN: Numerical simulation of three-dimensional flows using the Chimera-technique	226
R. HENKE: First results from the „A 320 HLF Fin“ Programme	234
T.J. HÜTTL, R. FRIEDRICH: Fully developed turbulent flow in conduits with circular cross section	242
J. van KEUK, J. BALLMANN: Numerical simulation of laminar symmetric corner flows in the hypersonic regime	250

CONTENTS (continued)

	Page
T. KRIBLER: A conceptual design methodology for the estimation of the local shock locations on optimized transonic wings	258
N. LANG: Investigation of the flow tracking capabilities of tracer particles for the application of PIV to supersonic flow fields	266
B. LEHMANN, J. MANTE: Turbulence behaviour of swirled dual-stream nozzle flows without and with combustion	274
J.A. LIESER, I. WALLBRUCH: CFD calculations of isolated jet engines with emphasis on jet mixing	282
T. LOESER, K. de GROOT, K.H. HORSTMANN: Design of an integral probe for temperature and flow vector measurements	291
M. MANHART: Using zonal grids for Direct Numerical Simulation of turbulent boundary layers with pressure gradients	299
U. MAUCHER, U. RIST, S. WAGNER: Transitional structures in a laminar separation bubble	307
J. MERTENS: Some important results of the Technology Programme RaWid	315
R. MESSING, M. KLOKER, S. WAGNER: Direct Numerical Simulation of suction through discrete holes in a three-dimensional boundary layer	323
J. MÜLLER, D. HUMMEL: An analysis of vortex breakdown predicted by a time-accurate Euler code	331
P. NIEDERDRENK, O. BRODERSEN: Controlled elliptic grid generation	339
D. RECKZEH: CFD-methods for the design process of high-lift-configurations	347
C. ROSSOW: A simple flux splitting scheme for compressible flows	355
R. RUDNIK, A. RONZHEIMER, J. RADDATZ: Numerical flow simulation for a wing/fuselage transport aircraft configuration with deployed high-lift system	363
H. SANAKNAKI, J. BALLMANN: A numerical simulation of a 2D- viscous hypersonic flow using the time-marching method of characteristics	371
S. SCHABER, H.E. FIEDLER: Hot wire measurements of the suction velocity and its distribution on the ELFIN II-wing model with hybrid laminar flow technology	379
D. SCHIMKE, U.T.P. ARNOLD, W. GEIBLER, R. KUBE, W.R. SPLETTSTÖSSER: Active rotor control by servo-flap and blade root control: recent results from flight test and windtunnel	386

CONTENTS (continued)

	Page
G. SCHRAUF, W. SCHRÖDER: Comparison of n-factor strategies using wind tunnel experiments and flight tests	394
N. SCHRÖDER, W. LOU, J. HOURMOUZIADIS: Combined test facility for three-dimensional mixing layer and unsteady boundary layer research	402
W. SCHRÖDER, G. SCHRAUF: Data preparation for the stability analysis of the ELFIN II HLF wing measurements in SiMa wind tunnel	410
A. SCHUBERT, T. CORATEKIN, J. BALLMANN: Numerical investigation of boundary layer separation caused by turbulent shock/boundary layer interaction	418
D. SCHWAMBORN, T. GERHOLD, V. HANNEMANN: On the validation of the DLR-Tau code	426
W. SEND, R. VOß: Effects of a contour bump on the unsteady transonic aerodynamic forces of the AMP wing	434
R. SEUBERT: Validation of the Preliminary Aircraft Design and Optimization program for Supersonic commercial transport aircraft PrADO-Sup	442
H.A. SILLER, H.H. FERNHOLZ: Active separation control on an airfoil by a periodic cross-flow	450
C. STEMMER, J. SUTTAN, M. KLOKER, W. NITSCHKE: Point-source induced transition in free flight	458
D. STROHMEYER: Extension of the predesign code PrADO for the evaluation of a three surface aircraft	466
M. SWOBODA, R. TEUSCH, V. GÜMMER, L. FOTTNER, U. WENGER: Experimental investigation of boundary layer transition in compressor cascades at unsteady periodic flow conditions	474
O. TRINKS, W.H. BECK: Application of the absorption spectroscopy for time resolved hypersonic flowfield measurements using the D2-transition of seeded atomic rubidium	482
B. URBAN, H. STETTER, N. VORTMEYER: Aerodynamic excitation of transonic turbine cascade: description of the experimental method	488
P. VOIGT, P. THEISEN: Experimental analysis of unsteady mixing in an RQL combustor segment aimed for validation of PDF models in the TRUST code	496
C. WAGNER, U.Ch. DALLMANN: A direct Navier-Stokes solver for turbulent flows over round steps	505

CONTENTS (continued)

	Page
P. WASSERMANN, M. KLOKER: Direct Numerical Simulation of the development and control of boundary-layer crossflow vortices	513
C. WEISHÄUPL, E. KREISELMAIER, G. HELLER, B. LASCHKA: Euler calculations for the flow around a delta wing during flap oscillations	521
W. WÜRZ, S. HERR, S. WAGNER, Y.S. KACHANOV: Experimental investigation on 3D acoustic receptivity of a laminar boundary layer in the presence of surface non-uniformities	529
