

Table of Contents

Full Papers

3D CMOL Crossnet for Neuromorphic Network Applications	1
<i>Kevin Ryan, Sansiri Tanachutiwat, and Wei Wang</i>	
Structural Fault Modelling in Nano Devices	6
<i>Manoj S. Gaur, Raghavendra Narasimhan, Vijay Laxmi, and Ujjwal Kumar</i>	
Proposal for Memristors in Signal Processing	11
<i>B. Mouttet</i>	
Normal and Reverse Temperature Dependence in Variation-Tolerant Nanoscale Systems with High-k Dielectrics and Metal Gates	14
<i>David Wolpert and Paul Ampadu</i>	
NEMS Capacitive Sensors for Highly Sensitive, Label-Free Nucleic-Acid Analysis	19
<i>Manu Sebastian Mannoor, Teena James, Dentcho V. Ivanov, Les Beadling, and William Braunlin</i>	
Impact of Process Variation in Fault-Resilient Streaming Nanoprocessors	26
<i>Michael Leuchtenburg, Pritish Narayanan, Teng Wang, and Csaba Andras Moritz</i>	
Hybrid DNA and Enzyme Based Computing for Address Encoding, Link Switching and Error Correction in Molecular Communication	28
<i>Frank Walsh, Sasitharan Balasubramaniam, Dmitri Botvich, Tatsuya Suda, Tadashi Nakano, Stephen F. Bush, and Mícheál Ó Foghlú</i>	
Hitting Time Analysis for Stochastic Communication	39
<i>Paul Bogdan and Radu Marculescu</i>	
FPAA Based on Integration of CMOS and Nanojunction Devices for Neuromorphic Applications	44
<i>Ming Liu, Hua Yu, and Wei Wang</i>	
Exploring Multi-layer Graphene Nanoribbon Interconnects	49
<i>Sansiri Tanachutiwat and Wei Wang</i>	
Digital Microfluidic Logic Gates	54
<i>Yang Zhao, Tao Xu, and Krishnendu Chakrabarty</i>	

Application of Molecular Electronics Devices in Digital Circuit Design	61
<i>Ci Lei, Dinesh Pamunuwa, Steven Bailey, and Colin Lambert</i>	
A Voltage Controlled Nano Addressing Circuit	66
<i>Bao Liu</i>	
A SWNT-Based Sensor for Detecting Human Blood Alcohol Concentration	69
<i>H. Leng and Y. Lin</i>	
A Dual-Mode Hybrid ARQ Scheme for Energy Efficient On-Chip Interconnects	74
<i>Bo Fu and Paul Ampadu</i>	
Using Randomly Assembled Networks for Computation	80
<i>Andrey Zykov and Gustavo de Veciana</i>	
Invited Papers	
A Biochemically-Engineered Molecular Communication System (Invited Paper)	85
<i>Satoshi Hiyama, Yuki Moritani and Tatsuya Suda</i>	
Random Walks on Random Graphs	95
<i>Colin Cooper and Alan Frieze</i>	
Optical Networking in a Swarm of Microrobots	107
<i>Paolo Corradi, Thomas Schmickl, Oliver Scholz, Arianna Menciassi, and Paolo Dario</i>	
Counting Photons Using a Nanonetwork of Superconducting Wires	120
<i>Andrea Fiore, Francesco Marsili, David Bitauld, Alessandro Gaggero, Roberto Leoni, Francesco Mattioli, Aleksander Divochiy, Alexander Korneev, Vitaliy Seleznev, Nataliya Kaurova, Olga Minaeva, and Gregory Gol'tsman</i>	
Communicating Mobile Nano-Machines and Their Computational Power	123
<i>Jiří Wiedermann and Lukáš Petrů</i>	
Author Index	131
