Contents

Preface — V

J. A. Tenreiro Machado and Virginia Kiryakova
Recent history of the fractional calculus: data and statistics — 1

Anatoly N. Kochubei and Yuri Luchko
Basic FC operators and their properties — 23

Rudolf Hilfer
Mathematical and physical interpretations of fractional derivatives and integrals — 47

Virginia Kiryakova
Generalized fractional calculus operators with special functions — 87

Anatoly N. Kochubei
General fractional calculus — 111

Virginia Kiryakova and Yuri Luchko
Multiple Erdélyi–Kober integrals and derivatives as operators of generalized fractional calculus — 127

Mateusz Kwaśnicki
Fractional Laplace operator and its properties — 159

Yuri Luchko and Virginia Kiryakova
Applications of the Mellin integral transform technique in fractional calculus — 195

Yuri Luchko
Fractional Fourier transform — 225

Yuri Luchko
The Wright function and its applications — 241

Rudolf Gorenflo, Francesco Mainardi, and Sergei Rogosin
Mittag-Leffler function: properties and applications — 269

Richard B. Paris
Asymptotics of the special functions of fractional calculus — 297

Bibliografische Informationen
http://d-nb.info/1168253365

digitalisiert durch DEUTSCHE NATIONAL BIBLIOTHEK

Moulay Rchid Sidi Ammi and Delfim F. M. Torres
Analysis of fractional integro-differential equations of thermistor type — 327

Ricardo Almeida and Delfim F. M. Torres
A survey on fractional variational calculus — 347

Teodor M. Atanacković, Sanja Konjik, and Stevan Pilipović
Variational principles with fractional derivatives — 361

Mark Meerschaert and Hans Peter Scheffler
Continuous time random walks and space-time fractional differential equations — 385

Mark M. Meerschaert, Erkan Nane, and P. Vellaisamy
Inverse subordinators and time fractional equations — 407

Mark M. Malamud
Spectral theory of fractional order integration operators, their direct sums, and similarity problem to these operators of their weak perturbations — 427

Anatoly N. Kochubei
Fractional differentiation in *p*-adic analysis — 461

Index — 473
