Preface — V

1	Optical measurement mechanics fundamentals — 1
1.1	Optics — 1
1.1.1	Geometrical optics — 1
1.1.2	Physical Optics — 4
1.2	Optical interference — 6
1.3	Optical diffraction — 8
1.3.1	Fresnel diffraction — 8
1.3.2	Fraunhofer diffraction — 9
1.4	Optical polarization — 10
1.5	Optical interferometers — 10
1.5.1	Michelson interferometer — 11
1.5.2	Mach-Zehnder interferometer — 12
1.5.3	Sagnac interferometer — 12
1.5.4	Fabry-Pérot interferometer — 13
1.6	Lasers — 14
2	Holography and holographic interferometry — 15
2.1	Holography — 15
2.1.1	Holographic recording — 15
2.1.2	Holographic reconstruction — 16
2.2	Holographic interferometry — 17
2.2.1	Phase calculation — 17
2.2.2	Double exposure holographic interferometry — 18
2.2.3	Real-time holographic interferometry — 21
2.2.4	Time-averaged holographic interferometry — 22
2.2.5	Real-time time-averaged holographic interferometry — 24
2.2.6	Stroboscopic holographic interferometry — 26
3	Speckle photography and speckle interferometry — 29
3.1	Speckle photography — 29
3.1.1	Double-exposure speckle photography — 29
3.1.2	Time-averaged speckle photography — 33
3.1.3	Stroboscopic speckle photography — 35
3.2	Speckle interferometry — 37
3.2.1	In-plane displacement measurement — 37
3.2.2	Out-of-plane displacement measurement — 38
3.3	Speckle shearing interferometry — 40

4	Geometric moiré and moiré interferometry — 42
4.1	Geometric moiré — 42
4.1.1	Geometric moiré formation — 43
4.1.2	Geometric moiré for strain measurement — 44
4.1.3	Shadow moiré for out-of-plane displacement measurement — 49
4.1.4	Reflection moiré for slope measurement — 52
4.2	Moiré interferometry — 53
4.2.1	Real-time method for in-plane displacement measurement — 53
4.2.2	Differential load method for in-plane displacement measurement — 55
5	Phase-shifting interferometry and phase unwrapping — 56
5.1	Phase-shifting interferometry — 56
5.1.1	Temporal phase-shifting interferometry — 57
5.1.2	Spatial phase-shifting interferometry — 60
5.2	Phase unwrapping — 62
5.2.1	Phase unwrapping principle — 62
5.2.2	Phase unwrapping experiments — 63
6	Discrete transformation and low-pass filtering — 65
6.1	Discrete transformation — 65
6.1.1	Discrete Fourier transform — 65
6.1.2	Discrete cosine transform — 69
6.2	Low-pass filtering — 71
6.2.1	Averaging smooth filtering in space domain — 72
6.2.2	Median smooth filtering in space domain — 73
6.2.3	Adaptive smooth filtering in space domain — 74
6.2.4	Ideal low-pass filtering in frequency domain — 75
6.2.5	Butterworth low-pass filtering in frequency domain — 76
6.2.6	Exponential low-pass filtering in frequency domain — 77
7	Digital holography and digital holographic interferometry — 80
7.1	Digital holography — 80
7.1.1	Digital holographic recording — 81
7.1.2	Digital holographic reconstruction — 82
7.1.3	Digital holographic experiments — 83
7.2	Digital holographic interferometry — 84
7.2.1	Principle of digital holographic interferometry — 84
7.2.2	Experiment of digital holographic interferometry — 85

8	Digital speckle interferometry and digital speckle shearing interferometry — 86
8.1	Digital speckle interferometry — 86
8.1.1	In-plane displacement measurement — 86
8.1.2	Out-of-plane displacement measurement — 90
8.2	Digital speckle shearing interferometry — 92
8.2.1	Principle of digital speckle shearing interferometry — 93
8.2.2	Experiment of digital speckle shearing interferometry — 94
9	Digital image correlation and particle image velocimetry — 96
9.1	Digital image correlation — 96
9.1.1	Image correlation principle — 96
9.1.2	Image Correlation Algorithm — 97
9.1.3	Image correlation system — 99
9.1.4	Image correlation experiment — 100
9.2	Particle image velocimetry — 101
9.2.1	Image velocimetry principle — 101
9.2.2	Image velocimetry algorithm — 102
9.2.3	Image velocimetry system — 104
Bibliography — 109	
Index — 111
