Preface — V

List of contributing authors — XIII

Risto S. Laitinen, Raija Oilunkaniemi and Tristram Chivers

1 Introduction of selenium and tellurium into reaction systems — 1

- 1.1 Introduction — 1
- 1.2 Elemental selenium — 2
 - 1.2.1 General — 2
 - 1.2.2 Anionic selenides and their derivatives — 3
 - 1.2.3 Selenium halogenides — 6
 - 1.2.4 Heterocyclic selenium sulfides — 6
 - 1.2.5 Homopolyatomic selenium cations — 8
 - 1.2.6 Triorganylphosphine selenides — 8
 - 1.2.7 Grignard and organyllithium reagents — 8
 - 1.2.8 Selenium and heavy group 14 reagents — 9
 - 1.2.9 Selenium–boron chemistry — 10
 - 1.2.10 Transition metal selenides — 11
- 1.3 Elemental tellurium — 12
 - 1.3.1 General — 12
 - 1.3.2 Anionic tellurides — 12
 - 1.3.3 Derivatives of anionic tellurides — 14
 - 1.3.4 Tellurium-containing chalcogen rings — 14
 - 1.3.5 Homopolyatomic tellurium cations — 15
 - 1.3.6 Triorganylphosphine tellurides — 15
 - 1.3.7 Grignard and organyllithium reagents — 16
 - 1.3.8 Silane- and germanetellones — 16
 - 1.3.9 Group 13 chemistry with tellurium — 16
 - 1.3.10 Titanocene chemistry — 18
 - 1.3.11 Solid-state and hydrothermal reactions — 19
- 1.4 Summary — 19
- References — 20

Tristram Chivers and Risto S. Laitinen

2 Selenium- and tellurium-halogen reagents — 27

- 2.1 Scope and introduction — 27
- 2.2 Binary chalcogen–halogen reagents — 28
 - 2.2.1 Selenium tetrahalides — 28
 - 2.2.2 Selenium oxychloride — 29
 - 2.2.3 Selenium dihalides — 31

2.2.4	Diselenium dihalides —	34
2.2.5	Mixtures of selenium halides —	36
2.2.6	Tellurium tetrahalides —	36
2.2.7	Tellurium dihalides and ditellurium dihalides —	41
2.3	Organochalcogen–halogen reagents —	44
2.3.1	Organoselenium and tellurium trihalides —	44
2.3.2	Diorgano-selenium and -tellurium dihalides —	46
2.3.3	Mixed-valent state compounds $R\text{TeX}_2\text{TeR}$ —	48
2.3.4	Organo-selenium and -tellurium monohalides —	48
2.4	Conclusions —	51
	References —	52

Alexandra Pop, Cristian Silvestru and Anca Silvestru

3	Organoselenium and organotellurium compounds containing chalcogen-oxygen bonds in organic synthesis or related processes —	61
3.1	Introduction —	61
3.2	Organoselenium compounds —	64
3.2.1	Organoselenium(II) compounds —	64
3.2.2	Organoselenium(IV) compounds —	69
3.2.3	Organoselenium(VI) compounds —	84
3.3	Organotellurium compounds —	91
3.3.1	Organotellurium(II) compounds —	91
3.3.2	Organotellurium(IV) compounds —	92
3.3.3	Organotellurium(VI) compounds —	107
3.4	Conclusion and outlook —	109
	Abbreviations —	110
	References —	111

Tristram Chivers and Risto S. Laitinen

4	Selenium- and tellurium–nitrogen reagents —	123
4.1	Scope and introduction —	123
4.2	Binary selenium–nitrogen and tellurium–nitrogen reagents —	124
4.2.1	Neutral species —	124
4.2.2	Cations —	127
4.2.3	Anions —	127
4.3	Chalcogen–nitrogen halides —	127
4.3.1	Ternary selenium–nitrogen halides —	127
4.3.2	Imido chalcogen halides —	129
4.4	$E(\text{NSO})_2$ reagents ($E = \text{Se}, \text{Te}$) —	130
4.5	Selenium/tellurium–nitrogen–silicon reagents —	131
4.6	Chalcogenylnitrosyls $\text{ArN}=\text{Se}$ —	134

4.7	Chalcogen(IV) diimides — 135
4.7.1	Synthesis, structures and applications in organic synthesis — 135
4.7.2	Thermal decomposition — 136
4.7.3	Insertion and cycloaddition reactions — 137
4.7.4	Reactions with nucleophiles and electrophiles — 138
4.8	Tris(<i>tert</i> -butylimido)tellurite dianion — 138
4.9	Chalcogen(II) amides and diamides — 139
4.10	Radical chemistry — 141
4.11	Conclusions — 143
	References — 143

Guoxiong Hua and J. Derek Woollins

5 Organophosphorus-selenium/tellurium reagents: from synthesis to applications — 151

5.1	Introduction — 151
5.2	Binary phosphorus-selenium/tellurium species — 152
5.2.1	Binary phosphorus-selenium species — 152
5.2.2	Binary phosphorus-tellurium species — 153
5.3	Organophosphorus(III)-selenium/tellurium compounds — 153
5.3.1	Organophosphorus(III)-selenium compounds — 153
5.3.2	Organophosphorus(III)-tellurium compounds — 155
5.4	Phosphorus(V)-selenides/tellurides — 156
5.4.1	Triorganylphosphine selenides — 156
5.4.2	Phosphinoselenoic chlorides and derivatives — 157
5.4.3	Phosphinoselenoic acids and derivatives — 162
5.4.4	<i>O,O,O</i> -Triorganorylphosphoroselenoates (RO) ₃ P=Se — 163
5.4.5	Tertiary phosphine tellurides R ₃ P=Te — 164
5.5	Diselenophosphinates/ditellurophosphinates — 166
5.5.1	Diselenophosphinates — 166
5.5.2	Tellurophosphinites and ditellurophosphinates — 172
5.6	Diselenaphosphetane diselenides and Woollins' reagent — 173
5.7	Phosphorus-selenium/tellurium amides and imides — 185
5.8	Outlook — 195
	References — 196

Jamie S. Ritch

6 Synthesis and coordination chemistry of cyclic seleno- and telloureas — 207

6.1	Introduction — 207
6.2	Structural variety of cyclic HCUs — 208
6.3	Synthesis of heavy chalcogenoureas — 209

6.3.1	Direct chalcogenation —	209
6.3.2	Deprotonation-chalcogenation —	209
6.3.3	One-pot reactions —	213
6.3.4	Other methods —	214
6.4	General properties of HCU's —	215
6.5	^{77}Se and ^{125}Te NMR spectroscopic properties —	217
6.6	Coordination chemistry —	217
6.6.1	p-block (groups 13–16) —	219
6.6.2	Group 12 —	222
6.6.3	Group 11 —	224
6.6.4	Group 10 —	231
6.6.5	Group 9 —	233
6.6.6	Group 8 —	235
6.6.7	Group 6 —	235
6.7	Conclusions and outlook —	236
	Abbreviations —	237
	References —	237

Fateh V. Singh and Thomas Wirth

7	Selenium and Tellurium Electrophiles in Organic Synthesis —	243
7.1	Introduction —	243
7.2	Selenium electrophiles —	243
7.2.1	Selenenylation reactions —	244
7.2.2	Selenenylation of aliphatic C–H bonds —	256
7.2.3	Selenenylation of aromatic C–H bonds —	258
7.2.4	Cyclizations —	264
7.2.5	Metal-catalyzed coupling reactions —	269
7.2.6	Carbene insertion reaction —	273
7.2.7	Rearrangements —	273
7.2.8	Catalytic reactions —	275
7.3	Chiral selenium electrophiles in stereoselective reactions —	281
7.4	Tellurium electrophiles in organic synthesis —	284
	References —	289

Peter C. Ho, Jin Wang and Ignacio Vargas-Baca

8	Reagents that Contain Se–H or Te–H Bonds —	301
8.1	Introduction —	301
8.2	Chalcogen dihydrides (H_2Ch) —	301
8.3	Sodium Hydrochalcogenides (NaHCh) —	303
8.4	Lithium dihydroselenoxo aluminate $\text{Li}(\text{AlH}_2\text{Se})$ —	305
8.5	Chalcogenols RChH —	305

- 8.6 Monochalcogenocarboxylic acids RC(O)ChH — 306
- 8.7 N,N-dimethyl Chalcogenocarbamic acids $\text{Me}_2\text{NC(O)ChH}$ — 308
- References — 309

Claudio Santi, Lucia Capoccia and Bonifacio Monti

9 Zinc-Selenium reagents in organic synthesis — 315

- 9.1 Introduction — 315
- 9.2 Oxidative zinc insertion in Se-Se and Se-X bond — 316
 - 9.2.1 Synthesis and reactivity of RSeZnSeR complexes — 316
 - 9.2.2 A versatile and recyclable biphasic system — 320
 - 9.2.3 Synthetic applications of TMEDA stabilized PhSeZnSePh — 322
 - 9.2.4 PhSeZn -halides and the unexpected on-water reactivity — 323
- References — 327

Alexander M. Polgar and John F. Corrigan

10 Recent advances in the self-assembly of polynuclear metal–selenium and –tellurium compounds from 14–16 reagents — 331

- 10.1 Introduction — 331
- 10.2 Silane elimination methods — 332
 - 10.2.1 Bis(trimethylsilyl)chalcogenide reagents — 333
 - 10.2.2 Organic trimethylsilylchalcogenides — 337
 - 10.2.3 Metal chalcogenide/chalcogenolate clusters — 345
 - 10.2.4 Metal trimethylsilylchalcogenolates — 351
- 10.3 Coordination of 14–16 ligands — 356
 - 10.3.1 Chalcogenidotetrelates — 356
 - 10.3.2 Organotetrel chalcogenides — 366
- 10.4 Summary — 370
- Notes — 371
- References — 371

Vimal K. Jain and G. Kedarnath

11 Applications of metal selenium/tellurium compounds in materials science — 383

- 11.1 Introduction — 383
- 11.2 Synthesis of chalcogenolate/chalcogenide complexes — 385
 - 11.2.1 Reactions of nucleophilic chalcogen reagents with metal salts — 385
 - 11.2.2 Oxidative addition of dichalcogenides — 386
 - 11.2.3 Ligand-exchange reactions — 388
 - 11.2.4 Chalcogenolysis method — 389
 - 11.2.5 Insertion of chalcogen into M-C bond — 389
- 11.3 Transition metal chalcogenolate/chalcogenide clusters — 390

11.4	Transition metal chalcogenolate precursors for metal chalcogenides — 397
11.4.1	Group 4 (Ti, Zr, Hf) chalcogenides — 397
11.4.2	Group 5 (V, Nb, Ta) chalcogenides — 398
11.4.3	Group 6 (Cr, Mo, W) chalcogenide materials — 399
11.4.4	Group 7 (Mn, Tc, Re) chalcogenides — 399
11.4.5	Group 8 (Fe, Ru, Os) chalcogenides — 400
11.4.6	Group 9 (Co, Rh, Ir) chalcogenides — 401
11.4.7	Group 10 (Ni, Pd, Pt) chalcogenides — 402
11.4.8	Group 11 (Cu, Ag, Au) chalcogenides — 404
11.4.9	Group 12 (Zn, Cd, Hg) chalcogenides — 407
11.5	Main group chalcogenolates as precursors for metal chalcogenides — 411
11.5.1	Group 13 chalcogenides — 411
11.5.2	Group 14 chalcogenides — 413
11.5.3	Group 15 chalcogenides — 416
11.6	f-block metal chalcogenolates as precursors for metal chalcogenides — 420
11.7	Ternary metal chalcogenides — 421
	Abbreviations — 427
	References — 427
