

Contents

Preface — V

1 Introduction — 1

- 1.1 Science, technology and technoscience — 1
- 1.2 Contents and objectives of the book — 3
- 1.3 Profile, style and structure of the book — 5

2 Selected concepts of logic and philosophy — 9

- 2.1 Typology of definitions — 9
- 2.2 Elements of formal logic — 12
 - 2.2.1 Statements and arguments — 12
 - 2.2.2 Elementary rules of deductive inference — 13
 - 2.2.3 Advanced rules of deductive inference — 15
 - 2.2.4 Rules of inductive and abductive inference — 16
- 2.3 Definition and structure of philosophy — 17
 - 2.3.1 Definition of philosophy — 17
 - 2.3.2 Structure of philosophy — 18
- 2.4 Key concepts of epistemology — 19
 - 2.4.1 Truth — 19
 - 2.4.2 Knowledge — 22
 - 2.4.3 Scientific laws and theories — 23

3 Science in historical perspective — 25

- 3.1 Protoscience — 25
 - 3.1.1 Ancient Egypt and Mesopotamia — 25
 - 3.1.2 Ancient Greece — 27
 - 3.1.3 Roman Empire — 29
 - 3.1.4 Arab empire — 29
 - 3.1.5 Medieval Europe — 30
- 3.2 Classical science — 30
 - 3.2.1 From Copernicus to Newton — 30
 - 3.2.2 From natural philosophy to sciences — 32
 - 3.2.3 From theory to practice — 34
 - 3.2.4 From steady growth to revolution — 36
- 3.3 Technoscience — 37

4 Philosophy of science in historical perspective — 41

- 4.1 Philosophy of protoscience — 41
- 4.2 Philosophy of classical science — 42
- 4.3 Philosophy of science in the first half of the twentieth century — 46

4.4	Philosophy of science in the second half of the twentieth century —	49
4.5	Recent trends in philosophy of science —	54
4.5.1	Neo-pragmatism —	54
4.5.2	Naturalism —	55
4.5.3	Scientific realism —	56
4.5.4	Bayesianism —	59
4.5.5	Specialisation —	61
5	Mathematical modelling —	63
5.1	Models in science —	63
5.2	Methodology of mathematical modelling —	66
5.3	Typology and examples of mathematical models —	71
5.4	Computational modelling —	75
5.5	Cognitive status of mathematical modelling —	79
5.5.1	Adequacy and accuracy of mathematical models —	79
5.5.2	Mathematical models and instrumentalism —	83
6	Measurement —	89
6.1	Basic concepts of measurement science —	89
6.2	System of quantities and measurement units —	95
6.3	Mathematical meta-model of measurement —	98
6.3.1	Development step #1 —	99
6.3.2	Development step #2 —	103
6.3.3	Development step #3 —	104
6.4	Interpretation of key concepts of measurement science in terms of mathematical modelling —	108
6.4.1	Measurand —	108
6.4.2	Calibration —	110
6.4.3	Measurement uncertainty —	111
7	Scientific explanation —	115
7.1	Institutional aims of science —	115
7.2	Scientific explanation <i>versus</i> scientific prediction —	115
7.3	Nomological explanation —	120
7.4	Causal explanation —	126
7.5	Computer-aided explanation —	136
7.6	Explanatory pluralism —	144
8	Context of discovery —	149
8.1	Discovery <i>versus</i> invention —	149
8.2	Theoretical aspects of technoscientific creativity —	150

8.3	Practical aspects of technoscientific creativity —	155
8.4	Generation of scientific hypotheses —	159
8.5	Preselection of scientific hypotheses —	160
9	Context of justification —	165
9.1	Preliminary considerations —	165
9.1.1	Basic concepts —	165
9.1.2	Introductory example —	167
9.2	Underdetermination and Duhem–Quine thesis —	170
9.3	Transformation of hypotheses into scientific knowledge —	172
9.3.1	Inference to best explanation —	173
9.3.2	Scientific evidence and confirmation —	176
9.3.3	Bayesian confirmation —	178
9.4	Research methods and research methodology —	182
9.4.1	Basic concepts —	182
9.4.2	Criteria of good research —	183
9.4.3	Contents of research methodology —	184
10	Uncertainty of scientific knowledge —	187
10.1	Preliminary considerations —	187
10.2	Critical <i>versus</i> naïve understanding of scientific method —	188
10.3	Demarcation problem —	189
10.4	Uncertainty of scientific reasoning —	193
10.5	Uncertainty of observation —	203
10.6	Measurement uncertainty —	204
10.6.1	Basic methods for evaluation of measurement uncertainty —	205
10.6.2	Advanced methods for evaluation of measurement uncertainty —	211
10.7	Mitigation of uncertainty of scientific knowledge —	215
11	Basic concepts of Western ethics —	219
11.1	Motivations and objectives —	220
11.2	Elements of metaethics and general ethics —	224
11.2.1	Good, value, morality —	225
11.2.2	Ethics and metaethics —	227
11.2.3	Monistic approaches to ethics —	230
11.2.4	Moral responsibility —	233
11.3	Relation of ethics to humanities, sciences, law and religion —	238
11.3.1	Relation of ethics to other philosophical disciplines —	238
11.3.2	Relation of ethics to sciences —	240
11.3.3	Relation of ethics to law and religion —	242

12	Western ethics in historical perspective — 245
12.1	Ancient and medieval concepts of ethics — 245
12.1.1	Ancient code-based ethics — 245
12.1.2	Ethical intellectualism of Socrates — 246
12.1.3	Eudaimonism of Plato — 247
12.1.4	Virtue ethics of Aristotle — 248
12.1.5	Moralism of stoics — 249
12.1.6	Christian ethics — 250
12.1.7	Ethics of natural law — 251
12.2	Modern concepts of ethics — 252
12.2.1	Ethics of human rights — 252
12.2.2	Moral sentimentalism of David Hume — 253
12.2.3	Formal ethics of Immanuel Kant — 253
12.2.4	Utilitarian ethics — 255
12.2.5	Material ethics of value — 257
12.2.6	Ethics of discourse — 258
12.2.7	Ethics of justice — 259
12.2.8	<i>Weltethos</i> or universal ethics — 261
13	System of values associated with science — 263
13.1	Preliminary considerations — 263
13.2	Typology of values — 264
13.2.1	General characteristics of values — 264
13.2.2	Epistemic and utilitarian values — 267
13.2.3	Ethical and social values — 269
13.2.4	Trust in science — 273
13.3	Conflicts of values — 276
14	Principles of moral decision-making — 283
14.1	Moral dilemma — 283
14.2	Selected patterns of ethical thinking — 288
14.2.1	General scheme of moral decision-making — 288
14.2.2	Selected tools of ethical thinking — 292
14.3	Decision theory <i>versus</i> ethical thinking — 294
15	General issues of research ethics — 305
15.1	Metaethical assumptions — 305
15.2	Typology and aetiology of research misconduct — 308
15.2.1	Typology of research misconduct — 308
15.2.2	Aetiology of research misconduct — 310
15.3	Evolution of research ethics — 313
15.4	Choice of a research problem — 315

15.5	Choice of research methodology —	320
15.5.1	Ethical background of research methodology —	320
15.5.2	Laboratory notebook —	322
16	Ethical aspects of experimentation —	325
16.1	Typology of experiment-related misconduct —	325
16.2	Experimentation with involvement of humans and animals —	326
16.2.1	Experimentation with involvement of humans —	326
16.2.2	Experimentation with involvement of animals —	330
16.3	Acquisition and processing of experimental data —	332
16.3.1	Fabrication, falsification and theft of data —	332
16.3.2	Intentional misinterpretation of data —	335
16.4	Technical infrastructure of experimentation —	338
16.4.1	Engineering aspects of experimentation —	338
16.4.2	Safety aspects of experimentation —	340
17	Ethical aspects of information processing —	343
17.1	Preliminary considerations —	343
17.2	Scientific discussion —	345
17.2.1	Principles of rational discussion —	346
17.2.2	Fallacious argumentation —	348
17.2.3	Eristic or art of being right —	351
17.3	Publication of research results —	353
17.3.1	Content and form of scientific publications —	353
17.3.2	Authorship of scientific publications —	358
17.3.3	Publication policy and its ethical implications —	363
17.4	Reviewing process —	367
17.4.1	General principles —	367
17.4.2	Editorial practices —	368
17.4.3	Decline of scientific criticism —	371
17.5	Research grant applications —	374
18	Legal protection of intellectual property —	377
18.1	Basic concepts related to intellectual property —	377
18.2	Legal protection of author's rights —	380
18.2.1	Subject and owner of author's rights —	380
18.2.2	Moral <i>versus</i> economic author's rights —	382
18.2.3	Scope of personal permissible use —	384
18.2.4	Citation rules —	385
18.3	Legal protection of inventor's rights —	389
18.3.1	Subject of inventor's rights —	389
18.3.2	Moral and economic inventor's rights —	392

XIV — Contents

18.3.3	Patenting procedure —	393
18.3.4	Limits of inventor's rights —	394
18.3.5	Justification of patent system —	396
18.4	Critical analysis of legal protection of economic author's and inventor's rights —	397
18.4.1	General philosophical argumentation —	398
18.4.2	Argumentation referring to differences between material and intellectual property —	400
18.4.3	Critical analysis of copyright —	402
18.4.4	Critical analysis of patent system —	403
18.5	Future of legal protection of intellectual property —	406
19	Ethical issues implied by information technologies —	415
19.1	Information technology in the age of globalisation —	415
19.2	Overview of ethical issues related to use of information technology —	417
19.3	Information technology in research practice —	422
19.4	Netiquette or internet ethics —	427
19.4.1	Netiquette rules —	428
19.4.2	Netiquette <i>versus</i> ethics of journalism —	431
20	Concluding remarks —	435
20.1	Evolution of research methodology and research ethics —	435
20.2	Education in research methodology and research ethics —	439
Appendix: Milestones in the history of science — 443
