Preface to the first edition — IX

Preface to the second edition — XIII

List of main symbols — XV

1 Dynamical systems — 1

- 1.1 Main definitions — 1
- 1.2 Embedding of a discrete dynamical system into a flow — 10
- 1.3 Local Poincaré diffeomorphism — 11
- 1.4 Time-periodic systems of differential equations — 13
- 1.5 Action of a group — 14

2 Topologies on spaces of dynamical systems — 16

- 2.1 C^0 -topology — 16
- 2.2 C^1 -topology — 17
- 2.3 Metrics on the space of systems of differential equations — 18
- 2.4 Generic properties — 23
- 2.5 Immersions and embeddings — 24

3 Equivalence relations — 26

- 3.1 Topological conjugacy — 26
- 3.2 Topological equivalence of flows — 30
- 3.3 Nonwandering set — 30
- 3.4 Local equivalence — 36

4 Hyperbolic fixed point — 37

- 4.1 Hyperbolic linear mapping — 37
- 4.2 The Grobman–Hartman theorem — 40
- 4.3 Neighborhood of a hyperbolic fixed point — 47
- 4.4 The stable manifold theorem — 52
- 4.5 Hyperbolic periodic point — 64

5 Hyperbolic rest point and hyperbolic closed trajectory — 66

- 5.1 Hyperbolic rest point — 66
- 5.2 Hyperbolic closed trajectory — 71

6	Transversality — 77
6.1	Transversality of mappings and submanifolds — 77
6.2	Transversality condition — 79
6.3	Palis lemma — 81
6.4	Transversality and hyperbolicity for one-dimensional mappings — 89
7	Hyperbolic sets — 90
7.1	Definition of a hyperbolic set — 90
7.2	Examples of hyperbolic sets — 92
7.3	Basic properties of hyperbolic sets — 95
7.4	Stable manifold theorem — 99
7.5	Axiom A — 101
7.6	Hyperbolic sets of flows — 109
8	Anosov diffeomorphisms — 116
9	Smale's horseshoe and chaos — 123
9.1	Smale's horseshoe — 123
9.2	Chaotic sets — 128
9.3	Homoclinic points — 129
10	Closing lemma — 131
11	C^0-generic properties of dynamical systems — 136
11.1	Hausdorff metric — 136
11.2	Semicontinuous mappings — 137
11.3	Tolerance stability and Takens' theory — 138
11.4	Attractors of dynamical systems — 142
12	Shadowing of pseudotrajectories in dynamical systems — 153
12.1	Definitions and results — 153
12.2	Proof of Theorem 12.1 — 158
12.3	Proof of Theorem 12.2 — 166
12.4	Proof of Theorem 12.3 — 169
13	Invariant measures — 174
13.1	Main definitions — 174
13.2	Construction of invariant measures — 175
13.3	Krylov–Bogolyubov theorem — 179
13.4	Ergodic theorems — 180
13.5	Poincaré recurrence and Hamiltonian systems — 189
13.6	Ergodic closing lemma — 195

A Scheme of the proof of the Mañé theorem — 196

B Lectures on selected chapters of the history of differential equations and dynamical systems — 206

B.1 Differential equations and Newton's anagram — 206

B.2 Development of the general theory — 208

B.3 Linear equations and systems — 212

B.4 Stability — 217

B.5 Nonlocal qualitative theory. Dynamical systems — 224

B.6 Structural stability — 228

B.7 Dynamical systems with chaotic behavior — 231

Bibliography — 236

Index — 239
