Preface — V

List of contributing authors — XIII

Part I Structural and dynamic characterization

Norbert Kučerka, Daniela Uhríková

- 1 Biophysical perspectives of lipid membranes through the optics of neutron and X-ray scattering — 3**

Tim Salditt, Karlo Komorowski, Kilian Frank

- 2 X-ray structure analysis of lipid membrane systems: solid-supported bilayers, bilayer stacks, and vesicles — 43**

Rebecca Eells, David P. Hoogerheide, Paul A. Kienzle, Mathias Lösche, Charles F. Majkrzak, Frank Heinrich

- 3 Structural investigations of membrane-associated proteins by neutron reflectometry — 87**

Elizabeth G. Kelley, Paul D. Butler, Michihiro Nagao

- 4 Collective dynamics in model biological membranes measured by neutron spin echo spectroscopy — 131**

Yan Xia, Mu-Ping Nieh

- 5 Spontaneous lipid transfer rate constants — 177**

Eugene Cheung, Darian Cash

- 6 Fundamentals of Nuclear Magnetic Resonance spectroscopy (NMR) and its applications — 195**

Michael F. Brown

- 7 Collective dynamics in lipid membranes — 231**

Laura N. Poloni, Amy Won, Christopher M. Yip

- 8 Mapping protein- and peptide-membrane interactions by atomic force microscopy: strategies and opportunities — 269**

Brittney L. Gorman, Ashley N. Yeager, Corryn E. Chini, Mary L. Kraft

- 9 Imaging the distributions of lipids and proteins in the plasma membrane with high-resolution secondary ion mass spectrometry — 287**

Part II Biomimetic, biorelated, or biological systems

James H. Davis, M. L. Schmidt

- 10 Cholesterol in model membranes — 325**

José Carlos Bozelli Junior, Richard M. Epanand

- 11 Study of mitochondrial membrane structure and dynamics on the molecular mechanism of mitochondrial membrane processes — 365**

Mitchell DiPasquale, Michael H.L. Nguyen, Thad A. Harroun, Drew Marquardt

- 12 Monitoring oxygen-sensitive membranes and vitamin E as an antioxidant — 391**

Jan Steinkühler, Rumiana Dimova

- 13 Giant vesicles: A biomimetic tool for assessing membrane material properties and interactions — 415**

Erwin London

- 14 Formation and properties of asymmetric lipid vesicles prepared using cyclodextrin-catalyzed lipid exchange — 441**

Volker Kiessling, Lukas K. Tamm

- 15 Application and characterization of asymmetric-supported membranes — 465**

Andrew F. Craig, Indra D. Sahu, Carole Dabney-Smith, Dominik Konkolewicz, Gary A. Lorigan

- 16 Styrene-maleic acid copolymers: a new tool for membrane biophysics — 477**

Part III Molecular dynamics – simulation and theory

M. Schick

17 On the origin of “Rafts”: The plasma membrane as a microemulsion — 499

Jonathan D. Nickels, John Katsaras

18 Combining experiment and simulation to study complex biomimetic membranes — 515

Yevhen Cherniavskiy, D. Peter Tieleman

19 Simulations of biological membranes with the Martini model — 551

Zhiqiang Shen, Alessandro Fisher, Huilin Ye, Ying Li

20 Multiscale modeling of lipid membrane — 569

Chun Chan, Xiaolin Cheng

21 Molecular dynamics simulation studies of small molecules interacting with cell membranes — 603

Index — 631
