

Contents

Preface — VII

List of Important Abbreviations and Symbols — XIII

List of Numbered Chemical Structures — XV

Chapter 1

Introduction — 1

- 1.1 Supramolecular chemistry — 2
- 1.2 Host–guest inclusion complexation in solution — 5
- References — 11

Chapter 2

Historical aspects — 15

- 2.1 Early examples of host–guest inclusion compounds — 17
- 2.2 History of the development of major families of hosts — 18
- 2.3 Proliferation of host–guest inclusion research — 23
- 2.4 Current state of solution-phase host–guest inclusion chemistry — 25
- References — 26

Chapter 3

Driving forces, thermodynamics, and kinetics of inclusion in aqueous solution — 31

- 3.1 Preparation, self-assembly, and mechanisms of inclusion complexation in aqueous solution — 32
- 3.2 Driving forces for inclusion in aqueous solution — 40
 - 3.2.1 Intermolecular forces between host and guest — 41
 - 3.2.2 Expulsion of water molecules from the host cavity — 44
 - 3.2.3 The hydrophobic effect in aqueous solution — 45
 - 3.2.4 Summary of driving forces for host inclusion in aqueous solution — 47
- 3.3 Thermodynamics of inclusion in solution — 47
- 3.4 Dynamics of inclusion in solution — 51
- 3.5 Host selectivity and modes of inclusion in solution — 53
- References — 55

Chapter 4

Spectroscopic methods for studying host–guest inclusion in solution — 61

- 4.1 Quantum mechanics and molecular energy levels — 63
- 4.2 The nature of light and its interaction with molecules — 67
- 4.3 Infrared absorption spectroscopy — 70
- 4.4 UV–vis absorption spectroscopy — 72
- 4.5 Fluorescence spectroscopy — 77
 - 4.5.1 Steady-state fluorescence spectroscopy — 87
 - 4.5.2 Time-resolved fluorescence spectroscopy — 94
- 4.6 Phosphorescence spectroscopy — 99
- 4.7 NMR spectroscopy — 100
- 4.8 Other spectroscopic methods and conclusion — 105
- References — 107

Chapter 5

Other experimental methods for studying host–guest inclusion in solution — 113

- 5.1 Electrochemical methods — 113
- 5.2 Calorimetric and other thermal methods — 116
- 5.3 Chromatographic methods — 119
- 5.4 Mass spectrometry methods — 123
- 5.5 Diffraction techniques — 125
- 5.6 Other miscellaneous methods — 130
- References — 130

Chapter 6

Extraction of binding constants from experimental data — 135

- 6.1 Extraction of binding constants from experimental titration data for 1:1 host:guest complexes — 136
 - 6.1.1 Benesi–Hildebrand analysis — 137
 - 6.1.1.1 Modifications of the Benesi–Hildebrand method for applications to other types of experimental data — 138
 - 6.1.1.2 Accuracy and limitations of the Benesi–Hildebrand method — 139
 - 6.1.2 Nonlinear least-squares analysis of fluorescence titration data — 140
- 6.2 Experimental determination of host:guest complex stoichiometry — 143
- 6.3 Extraction of binding constants from experimental data for higher order host:guest complexes — 144
- 6.4 Error analysis and reproducibility of binding constants extracted from experimental titration data — 146

| | | |
|-----|---|-----|
| 6.5 | Other mathematical and/or experimental approaches — | 147 |
| | References — | 148 |

Chapter 7

Cyclodextrins as hosts — 151

| | | |
|-------|---|-----|
| 7.1 | Introduction to cyclodextrins — | 151 |
| 7.2 | Physicochemical properties of cyclodextrins — | 153 |
| 7.3 | Modified cyclodextrins — | 156 |
| 7.3.1 | Substitution at the primary hydroxyls — | 158 |
| 7.3.2 | Substitution at the secondary hydroxyls — | 158 |
| 7.3.3 | Specific examples of modified cyclodextrins used as molecular hosts — | 159 |
| 7.3.4 | Monosubstitution of tethered active moieties — | 161 |
| 7.4 | Host properties of native and modified CDs in aqueous solution — | 163 |
| 7.5 | Polymers containing CD host moieties — | 171 |
| 7.6 | Summary of CDs as molecular hosts — | 173 |
| | References — | 173 |

Chapter 8

Cucurbit[*n*]urils as hosts — 177

| | | |
|-------|---|-----|
| 8.1 | Introduction to cucurbit[<i>n</i>]urils — | 177 |
| 8.2 | Synthesis of cucurbit[<i>n</i>]urils — | 178 |
| 8.3 | Physicochemical properties of cucurbit[<i>n</i>]urils — | 182 |
| 8.4 | Cucurbit[<i>n</i>]urils as molecular hosts in aqueous solution — | 184 |
| 8.4.1 | Cucurbituril (cucurbit[6]uril) as host — | 187 |
| 8.4.2 | Cucurbit[7]uril as host — | 192 |
| 8.4.3 | Cucurbit[<i>n</i>]urils, $n \geq 8$ as hosts — | 196 |
| 8.5 | A Comparison of the aqueous host binding properties of cucurbit[<i>n</i>]urils and CDs — | 198 |
| 8.6 | Cucurbit[<i>n</i>]uril derivatives and analogues as hosts in aqueous solution — | 200 |
| 8.7 | Cucurbit[<i>n</i>]urils as molecular beads in rotaxanes and building blocks for nanodevices — | 203 |
| 8.8 | Summary of cucurbit[<i>n</i>]urils as molecular hosts — | 204 |
| | References — | 205 |

Chapter 9

Other molecular hosts in aqueous solution — 209

| | | |
|-----|---------------------------|-----|
| 9.1 | Calix[<i>n</i>]arenes — | 209 |
| 9.2 | Cavitands — | 213 |
| 9.3 | Cryptands — | 215 |

| | | |
|------|---------------------------------------|-----|
| 9.4 | Cryptophanes — | 216 |
| 9.5 | Carcerands and hemicarcerands — | 217 |
| 9.6 | Dendrimers — | 218 |
| 9.7 | Pillar[n]arenes — | 221 |
| 9.8 | Bambus[n]urils — | 222 |
| 9.9 | Cyclophanes — | 223 |
| 9.10 | Other miscellaneous molecular hosts — | 225 |
| | References — | 226 |

Chapter 10

Host–guest inclusion in mixed aqueous and nonaqueous solution — 231

| | | |
|--------|---|-----|
| 10.1 | Introduction — | 231 |
| 10.2 | Host–guest inclusion in mixed aqueous-organic solution — | 232 |
| 10.3 | Host–guest inclusion in pure nonaqueous solution — | 234 |
| 10.3.1 | Cyclodextrin inclusion complexes in nonaqueous solution — | 235 |
| 10.3.2 | Inclusion complexes of other hosts in nonaqueous solution — | 237 |
| 10.4 | Conclusions — | 238 |
| | References — | 238 |

Chapter 11

Applications of host–guest inclusion in solution — 241

| | | |
|------|---|-----|
| 11.1 | Analytical applications — | 241 |
| 11.2 | Molecular sensors and molecular recognition — | 244 |
| 11.3 | Control of guest reactivity — | 248 |
| 11.4 | Medicinal and pharmaceutical applications — | 249 |
| 11.5 | Water treatment and environmental remediation — | 252 |
| 11.6 | Industrial applications — | 254 |
| 11.7 | Other applications and summary — | 255 |
| | References — | 256 |

Chapter 12

Conclusions and summary — 261

| | |
|--------------|-----|
| References — | 265 |
|--------------|-----|

Index — 267
