

Contents

Preface — V

Chapter 1

Synthetic procedures — 1

- 1.1 Poly(dichloro)phosphazene — 1
- 1.2 Macromolecular substitution — 3
- 1.3 Ring-opening polymerization — 4
- 1.4 Chain growth polycondensation — 6
- 1.5 Macromolecular architecture — 10
 - 1.5.1 P=N backbone branching — 10
 - 1.5.2 Grafting — 13
 - 1.5.3 Block copolymers — 16
 - 1.5.4 Self-assembly — 18
- 1.6 Conclusion — 21
- References — 22

Chapter 2

Degradable poly(organo)phosphazenes — 27

- 2.1 Bioerodible polymers for biomedicine — 27
 - 2.1.1 Bioerodible solid biomaterials and polymer matrices — 28
 - 2.1.2 Water-soluble, degradable polymers — 30
- 2.2 Poly(organo)phosphazene degradation — 31
 - 2.2.1 Side-group influence on degradation kinetics — 32
 - 2.2.2 Amino acid ester-derived polyphosphazenes — 35
 - 2.2.3 The effect of pH — 38
 - 2.2.4 Stimuli-responsive degradation — 39
- 2.3 Degradable molecular-level hybrids — 41
- 2.4 Blends of poly(organo)phosphazenes — 43
- 2.5 Bulk *versus* surface erosion — 45
- 2.6 Degradation product cytotoxicity — 46
- 2.7 Conclusion — 46
- References — 47

Chapter 3

Nanomedicine — 53

- 3.1 Polyphosphazenes in immunology — 54
 - 3.1.1 Vaccine adjuvants and delivery systems — 54
 - 3.1.2 Polyphosphazene electrolytes as immunological adjuvants — 56
 - 3.1.3 Structure–activity relationships — 57
 - 3.1.4 Safety considerations — 60

3.1.5	Immunological activity —	61
3.1.6	Polyelectrolyte microsphere formulations —	63
3.1.7	Alternative delivery routes —	64
3.2	Protein delivery —	66
3.3	Cationic polyphosphazenes and their polyplexes —	67
3.3.1	Gene delivery —	67
3.3.2	Gene silencing —	70
3.3.3	Charged polyphosphazenes for enteral drug delivery —	71
3.4	Controlled release from polyphosphazene matrices —	72
3.4.1	Polyphosphazene-based drug depot devices —	72
3.5	Polymer therapeutics —	74
3.5.1	Macromolecular drug carriers —	74
3.5.2	Polyphosphazene drug conjugates —	75
3.5.3	Polyphosphazene carriers for photodynamic therapy —	81
3.5.4	Colon-specific azo-based drug conjugates —	82
3.6	Self-assembled micelles and polymersomes —	84
3.7	Thermosensitive poly(organo)phosphazenes —	87
3.7.1	Thermosensitive polymers —	87
3.7.2	Thermosensitive polyphosphazene drug carriers —	88
3.7.3	Injectable hydrogels —	89
3.8	Theranostics —	93
3.9	Conclusion —	95
	References —	96

Chapter 4

Tissue engineering — 107

4.1	Introduction to tissue engineering —	107
4.2	Architecture of polyphosphazene scaffolds for tissue engineering —	107
4.2.1	Formats —	109
4.2.1.1	Linear polyphosphazenes —	109
4.2.1.2	Cross-linked polyphosphazenes —	112
4.2.2	Properties —	116
4.3	Applications of polyphosphazene scaffolds in tissue engineering —	120
4.3.1	Bone tissue engineering —	121
4.3.2	Endothelial tissue engineering —	126
4.3.3	Neural tissue engineering —	128
4.4	Degradation of polyphosphazenes developed for tissue engineering —	129
4.5	Conclusion —	135
	References —	135

Chapter 5

Opportunities and challenges — 139

5.1 From laboratory to clinic — **139**

5.2 Future prospects — **140**

References — **141**

Abbreviations — 143

Index — 147
