

Contents

Introduction — V

Conference booklet and talks — VII

Remembrances of Gilbert — XI

Sergey Bakulin and Alexei Miasnikov

Explicit universal axioms for Kaplansky groups — 1

Gilbert Baumslag, Martin R. Bridson, and Charles F. Miller III

Isoperimetric and isodiametric functions of group extensions — 7

Martin R. Bridson

The homology of groups, profinite completions, and echoes of Gilbert Baumslag — 11

Anthony E. Clement

Some properties of the Baumslag groups $G(m, n)$ — 29

Anthony M. Gaglione and Dennis Spellman

Some model theory of the Heisenberg group: I — 33

Anthony M. Gaglione and Dennis Spellman

Some model theory of the Heisenberg group: II — 47

Benjamin Fine, Anja I. S. Moldenhauer, and Gerhard Rosenberger

On vector-valued Hecke forms — 53

Rita Gitik

Two algorithms in group theory — 73

Rita Gitik and Eliyahu Rips

On products of closed subsets in free groups — 81

Ron Hirshon

Misbehaved direct products — 85

Neha Hooda

A survey on Albert algebras and groups of type F_4 — 89

David Joyner and Caroline Melles

Perspectives on p -ary bent functions — 103

Delaram Kahrobaei, Antonio Tortora, and Maria Tota

Multilinear cryptography using nilpotent groups — 127

Ilya Kapovich

Musings on generic-case complexity — 135

Martin Kreuzer and Xingqiang Xiu

Noncommutative Gebauer–Möller criteria — 149

Martin Kreuzer and Gerhard Rosenberger

On the numbers of the form $x^2 + 11y^2$ — 177

Stephen Majewicz and Marcos Zyman

Separability properties of nilpotent $\mathbb{Q}[x]$ -powered groups — 203

Barry B. Mittag

Infinite nested radicals — 219

Mohammad Reza R. Moghaddam, Gerhard Rosenberger, and Mohammad Amin Rostamyari

Commutative transitivity property in groups and Lie algebras — 225

Leonard Wienke

Simplicial subdivisions and the chromatic number of a group — 233
