I. Disorder in Ion Implanted Silicon

I.1	Ionization and Thermal Dependences of Implantation Disorder in Silicon S.T. Picraux, F.L. Vook	1
I.2	Localized Mode of Substitutional Carbon in Ion-Implanted Silicon H.J. Stein	2
I.3	Inventory of Paramagnetic Defects in Ion-Implanted Silicon K.L. Brower, W. Beezhold	7
I.4	Structural Differences in Light and Heavy Ion Disorder in Si Studied by Single and Double Alignment Channeling Techniques J.K. Hirvonen, W.L. Brown, P.M. Glotin	8
I.5	Investigation of Ion Implantation Damage with Stress Measurements E.P. EerNisse	17
I.6	Energy Levels of Defects in Ion Implanted Silicon D.E. Davies, S.A. Roosild	23
I.7	Photoconductivity of Boron Implanted Silicon B. Nétange, M. Cherki, P. Baruch	33
I.8	Electron Paramagnetic Resonance on Divacancies in Phosphorus-Implanted Silicon J.G. deWit, C.A.J. Ammerlaan	39

II. Implantation of Boron and Phosphorus into Silicon

II.1	Distribution of Boron Implanted Silicon T.E. Seidel	47
II.2	Phosphorus Channeled in Silicon: Profiles and Electrical Activity R.A. Moline, G.W. Reutlinger	58
II.3	Enhanced Annealing Effects of Boron Implanted Layers in Silicon by Post-Implantation of Silicon Ions L.O. Bauer	70

II.4	Electrical Profiles of Ion Implanted Silicon and their Comparison with Defect Structures S.M. Davidson	79
II.5	A New Method for Boron Doping of Silicon by Implantation of BF_2 -Molecules H. Müller, H. Ryssel, I. Ruge	85
II.6	Crystal Defects and Electrical Properties in Ion-Implanted Silicon M. Tamura, T. Ikeda, T. Tokuyama	96
II.7	Amorphization of Silicon Crystals Bombarded by 30 keV Phosphorus Ions at Different Temperatures K.H. Eklund, Å. Andersson	103
II.8	Additional Ion Bombardment of Well Annealed Silicon Crystals Implanted with Phosphorus and Arsenic Å. Andersson, G. Swenson	110
II.9	The Influence of Ion Beam Current Densities on the Electrical Properties of Boron Implanted Silicon N.G. Blamires	119
II.10	The Evaluation of Electrically Active Damage in Hot, Phosphorus Implantations in Silicon by Means of Hall-Effect Measurements C. MacDonald, G. Galster	124

III. Implantation into Compound Semiconductors

III.1	Backscattering Analysis and Electrical Behavior of SiC Implanted with 40 keV Indium R.R. Hart, H.L. Dunlap, O.J. Marsh	134
III.2	Anomalous Diffusion of Defects in Ion-Implanted GaAs F.L. Vook, S.T. Picraux	141
III.3	Enhanced Diffusion in Ion-Bombarded GaAs G.W. Arnold	151
III.4	The Effects of Dose Rate and Implantation Temperature on Lattice Damage and Electrical Activity in Ion Implanted GaAs J.S. Harris	157
III.5	The Effects of Arsenic Ion Implantation in GaAs T. Itoh, Y. Kushiro	168
III.6	Implantation of Zinc into GaAs at 1 MeV P.N. Favennec	174
III.7	Implantation of Bi into GaP III. Hot-Implant Behaviour J.L. Merz, D.W. Mingay, W.M. Augustyniak, L.C. Feldman	182
III.8	The Influence of Various Parameters on Radiation Damage in GaP J.D. Haskell, W.A. Grant, G.A. Stephens, J.L. Whitton	193
III.9	The Retention of Bi Ions Implanted in GaAs A.W. Tinsley, W.A. Grant, G. Carter, M.J. Nobes	199
III.10	The Annealing Behaviour of Gallium Phosphide in the Region 110–500°K after 300 keV Neon Irradiation T.G. Williams, D.W. Palmer	205

IV. Compound and Amorphous Semiconductors

IV.1	Compensation of N-Type GaAs by Proton Bombardement B.R. Pruniaux, J.C. North, G.L. Miller	212
IV.2	Ion Implanted p-n Junctions in GaAs _{0.6} P _{0.4} K.R. Faulkner, A. Todkill.....	222
IV.3	Lattice Disorder and Outdiffusion in Ion Implanted InSb and CdTe G. Langguth, E. Lang, O. Meyer	228
IV.4	Ion-Implantation of Nitrogen into n-Type Cadmium Sulfide Y. Shiraki, T. Shimada, K.F. Komatsubara	235
IV.5	Infrared Studies of SiC, Si ₃ N ₄ , and SiO ₂ Formation in Ion-Implanted Silicon J.A. Borders, W. Beezhold	241
IV.6	Ion Implantation and Amorphous Materials J.A. Olley, A.D. Yoffe	248
IV.7	Raman Spectra of Amorphous Semiconductors Prepared by Ion Bombardement B.L. Crowder, J.E. Smith, Jr., M.H. Brodsky, M.I. Nathan	255
IV.8	Effects of Implantation on Thin Layers of Aluminum Metallization on Silicon D.H. Lee, O.J. Marsh, R.R. Hart	262
IV.9	Crystalline to Amorphous Transformation in Ion-Bombarded Silicon W. Beezhold	267

V. Techniques and Germanium

V.1	Analysis of Contact Formation and Surface Layers on Semiconductors J.W. Mayer, I.V. Mitchell, M.A. Nicolet	274
V.2	New Aspects of Atom Location: Flux Peaking F.H. Eisen	287
V.3	Dimpling - a New Manifestation of Ion Produced Lattice Damage R.L. Meek, W.M. Gibson, J.P.F. Sellschop	297
V.4	The Use of Ion-Induced X-Rays to Investigate the Concentration Distribution and Atom Location of Boron-Implanted Silicon J.A. Cairns, R.S. Nelson, J.S. Briggs.....	299
V.5	Electrical Properties of Ion Implanted Germanium H. Herzer, S. Kalbitzer.....	307

VI. Devices 1

VI.1	Recent Advances in Ion Implanted MOS Technology H.G. Dill, T.N. Toombs, L.O. Bauer.....	315
VI.2	Recent Advances in Ion Implanted Junction-Device Technology A.U. MacRae	329

VI.3	Enhanced Diffusion of Substrate Impurities into Epitaxial Layers in Si by Proton Irradiation Y. Ohmura, T. Abe, S. Mimura, M. Konaka, M. Kanazawa, H. Ohtsubo, K. Fujinuma	335
VI.4	Junction Field Effect Transistors Fabricated by Ion Implantation A. Bobenrieth, T.P. Ngu, C. Arnodo	340
VI.5	Microwave Transistors Fabricated by Ion-Implantation Selection of Doping Impurities and Phototype Realization M. Morizot, A. Dubee, A. Cornette	345
VI.6	Application of Ion Implantation to N-P-N-Transistors J.L. Assemat	351
VI.7	New Techniques for Improving High Value Ion Implanted Resistors K.H. Nicholas, R.A. Ford	357
VI.8	Piezoresistive Properties of Ion Implanted Layers in Silicon R.P. Donovan, M.A. Littlejohn, S.A. Roosild	362

VII. Devices 2

VII.1	Surface States Induced by Ion Implantation W. Fahrner, A. Goetzberger	373
VII.2	Speed Improvement of Ion Implanted Self Aligned Gate MOS Transistors J. Bernard	383
VII.3	Chemical and Electrical Behaviour of Ion Implanted SiO ₂ Films A. Monfret, J. Bernard	389
VII.4	Ion Implanted Thermoresistive Device for Cryogenic Temperatures J. Bernard, G. Guernet, M. Montier, L. Peccoud	397
VII.5	Ion Implanted Light Sensing Diodes D.A. Peterman, R.J. Dexter, R.W. Echols, I.H. Morgan	404
VII.6	The Application of Ion Implantation to Avalanche Multiplication Devices P.E. Gibbons	410
VII.7	Ion Implanted p-n Junctions in Near Intrinsic n-Type Silicon for Nuclear Particle Detectors J.H. Howes	414
VII.8	Boron Implanted Contacts on High Purity Germanium J.P. Ponpon, J.J. Grob, R. Stuck, P. Burger, P. Siffert	420
VII.9	New Ion Implantation Areas W.L. Brown	430

VIII. Implantation into Silicon

VIII.1	Non-Gaussian Implantation Profiles G. Dearnaley, M.A. Wilkins, P.D. Goode	439
VIII.2	Atom Location in the Case of Enhanced Diffusion Measured by Backscattering Method K. Masuda, K. Gamo, A. Imada, S. Namba	455

VIII.3	Enhanced Diffusion and Electrical Properties of Ion Implanted Silicon K. Gamo, M. Iwaki, K. Masuda, S. Namba, S. Ishihara, I. Kimura	459
VIII.4	The Presence of Deep Levels in Silicon Implanted with Channeled Low Energy Phosphorus Ions N.B. Urli, R. Gislén	466
VIII.5	Mobility, Resistivity and Carrier Concentration Measured on Silicon Implanted with Channeled and Nonchanneled Indium Ions G. Astrup, A. Johansen, J.S. Olsen, L. Sarholt-Kristensen	473
VIII.6	Ionization Energy Determination in Indium Implanted Silicon R.D. Pashley	485
VIII.7	Some Observations on High Energy Nitrogen Implantations in Silicon J. Stephen, B.J. Smith, G.W. Hinder, D.C. Marshall, E.M. Wittam.....	489
VIII.8	Nitrogen Implantation of p-Silicon at Cryogenic Temperatures P.P. Pronko, J.B. Mitchell, J. Shewchun	495
VIII.9	Conductive Properties of the Ion Implanted Binary System $\text{Si}_{1-x}\text{Al}_x$ H. Kräutle, S. Kalbitzer.....	499
