## Keynote Talks

|                                                                           |    |
|---------------------------------------------------------------------------|----|
| Formal Methods in Energy Informatics .....                                | 1  |
| <i>Holger Hermanns</i>                                                    |    |
| Formal Methods as a Link between Software Code and Legal Rules .....      | 3  |
| <i>Daniel Le Métayer</i>                                                  |    |
| Developing Model-Checking Mechanisms for ASSL: An Experience Report ..... | 19 |
| <i>Emil Vassev and Mike Hinchey</i>                                       |    |
| Models and Communication in the Policy Process .....                      | 35 |
| <i>Matteo Pedercini</i>                                                   |    |

## Regular Papers

|                                                                                                                                    |     |
|------------------------------------------------------------------------------------------------------------------------------------|-----|
| Distributed Implementation of Systems with Multiparty Interactions and Priorities .....                                            | 38  |
| <i>Imene Ben-Hafaiedh, Susanne Graf, and Nejla Mazouz</i>                                                                          |     |
| Verification of PLC Properties Based on Formal Semantics in Coq .....                                                              | 58  |
| <i>Jan Olaf Blech and Sidi Ould Biha</i>                                                                                           |     |
| Broadcast Psi-calculi with an Application to Wireless Protocols .....                                                              | 74  |
| <i>Johannes Borgström, Shuqin Huang, Magnus Johansson, Palle Raabjerg, Björn Victor, Johannes Åman Pohjola, and Joachim Parrow</i> |     |
| A Formalisation of Java Strings for Program Specification and Verification .....                                                   | 90  |
| <i>Richard Bubel, Reiner Hähnle, and Ulrich Geilmann</i>                                                                           |     |
| dCTL: A Branching Time Temporal Logic for Fault-Tolerant System Verification .....                                                 | 106 |
| <i>Pablo F. Castro, Cecilia Kilmurray, Araceli Acosta, and Nazareno Aguirre</i>                                                    |     |
| A Machine-Checked Framework for Relational Separation Logic .....                                                                  | 122 |
| <i>Juan Manuel Crespo and César Kunz</i>                                                                                           |     |
| A Dataflow Analysis to Improve SAT-Based Bounded Program Verification .....                                                        | 138 |
| <i>Bruno Cuervo Parrino, Juan Pablo Galeotti, Diego Garbervetsky, and Marcelo F. Frias</i>                                         |     |

|                                                                                                              |     |
|--------------------------------------------------------------------------------------------------------------|-----|
| Reverse Hoare Logic .....                                                                                    | 155 |
| <i>Edsko de Vries and Vasileios Koutavas</i>                                                                 |     |
| Improving SAT Modulo ODE for Hybrid Systems Analysis by<br>Combining Different Enclosure Methods .....       | 172 |
| <i>Andreas Eggert, Nacim Ramdani, Nedialko Nedialkov, and<br/>Martin Fränzle</i>                             |     |
| Verification of $B^+$ Trees: An Experiment Combining Shape Analysis<br>and Interactive Theorem Proving ..... | 188 |
| <i>Gidon Ernst, Gerhard Schellhorn, and Wolfgang Reif</i>                                                    |     |
| Runtime Verification of Component-Based Systems .....                                                        | 204 |
| <i>Yliès Falcone, Mohamad Jaber, Thanh-Hung Nguyen,<br/>Marius Bozga, and Saddek Bensalem</i>                |     |
| Translating Alloy Specifications to UML Class Diagrams Annotated<br>with OCL .....                           | 221 |
| <i>Ana Garis, Alcino Cunha, and Daniel Riesco</i>                                                            |     |
| Safe Distribution of Declarative Processes .....                                                             | 237 |
| <i>Thomas Hildebrandt, Raghava Rao Mukkamala, and Tijs Slaats</i>                                            |     |
| Verifying B Proof Rules Using Deep Embedding and Automated<br>Theorem Proving .....                          | 253 |
| <i>Mélanie Jacquél, Karim Berkani, David Delahaye, and<br/>Catherine Dubois</i>                              |     |
| Hybrid Specification of Reactive Systems: An Institutional Approach ...                                      | 269 |
| <i>Alexandre Madeira, José M. Faria, Manuel A. Martins, and<br/>Luís S. Barbosa</i>                          |     |
| Leveraging State-Based User Preferences in Context-Aware<br>Reconfigurations for Self-Adaptive Systems ..... | 286 |
| <i>Marco Mori, Fei Li, Christoph Dorn, Paola Inverardi, and<br/>Schahram Dustdar</i>                         |     |
| Context-Bounded Model Checking of LTL Properties for ANSI-C<br>Software .....                                | 302 |
| <i>Jeremy Morse, Lucas Cordeiro, Denis Nicole, and Bernd Fischer</i>                                         |     |
| Modular Modelling of Software Product Lines with Feature Nets .....                                          | 318 |
| <i>Radu Muschević, José Proença, and Dave Clarke</i>                                                         |     |

|                                                                                                    |     |
|----------------------------------------------------------------------------------------------------|-----|
| Synchronizing Asynchronous Conformance Testing .....                                               | 334 |
| <i>Neda Noroozi, Ramtin Khosravi, Mohammad Reza Mousavi, and<br/>Tim A.C. Willemse</i>             |     |
| Using Coq in Specification and Program Extraction of Hadoop<br>MapReduce Applications.....         | 350 |
| <i>Kosuke Ono, Yoichi Hirai, Yoshinori Tanabe, Natsuko Noda, and<br/>Masami Hagiya</i>             |     |
| ProMoVer: Modular Verification of Temporal Safety Properties .....                                 | 366 |
| <i>Siavash Soleimanifard, Dilian Gurov, and Marieke Huisman</i>                                    |     |
| Usable Verification of Object-Oriented Programs by Combining Static<br>and Dynamic Techniques..... | 382 |
| <i>Julian Tschannen, Carlo A. Furia, Martin Nordio, and<br/>Bertrand Meyer</i>                     |     |

## Short Papers

|                                                                                |     |
|--------------------------------------------------------------------------------|-----|
| Efficient Computation of Dominance in Component Systems<br>(Short Paper) ..... | 399 |
| <i>Jaap Boender</i>                                                            |     |

## Tool Papers

|                                                                                                |     |
|------------------------------------------------------------------------------------------------|-----|
| The Boogie Verification Debugger (Tool Paper) .....                                            | 407 |
| <i>Claire Le Goues, K. Rustan M. Leino, and Michal Moskal</i>                                  |     |
| Object-Oriented Formal Modeling and Analysis of Interacting Hybrid<br>Systems in HI-Maude..... | 415 |
| <i>Muhammad Fadlisyah, Peter Csaba Ölveczky, and Erika Ábrahám</i>                             |     |

## Special Track: “Modelling for Sustainable Development”

|                                                                                                      |     |
|------------------------------------------------------------------------------------------------------|-----|
| Towards an Agent-Based Methodology for Developing Agro-Ecosystem<br>Simulations .....                | 431 |
| <i>Jorge Corral and Daniel Calegari</i>                                                              |     |
| Development Policy Analysis in Mali: Sustainable Growth Prospects....                                | 447 |
| <i>Matteo Pedercini</i>                                                                              |     |
| Using System Dynamics to Assess the Role of Socio-economic Status in<br>Tuberculosis Incidence ..... | 464 |
| <i>Marisa Analía Sánchez</i>                                                                         |     |

Energy Consumption and CO<sub>2</sub> Emissions of Beijing Heating System:  
Based on a System Dynamics Model..... 476  
    *Hefeng Tong and Weishuang Qu*

A Formal Approach to Analysing Knowledge Transfer Processes in  
Developing Countries ..... 486  
    *Jin Tong, Siraj A. Shaikh, and Anne E. James*
