

Cross-Dehydrogenative Coupling

	Preface	V
	Abstracts	IX
	Table of Contents	XXIII
1	Introduction	
	D. Maiti	1
2	Cross-Dehydrogenative Coupling: Development and Perspectives	
	C.-Y. Huang, H. Kang, and C.-J. Li	5
3	Mechanistic Aspects of Transition-Metal-Catalyzed and Non-Transition-Metal-Mediated Cross-Dehydrogenative Coupling	
	R. Logeswaran, N. Aravindan, and M. Jeganmohan	15
4	Cross-Dehydrogenative Coupling Involving Alkynes for C(sp²)—C(sp) Bond Formation	
	J. Escudero and T. Besset	41
5	(Het)Arene/(Het)Arene Cross-Dehydrogenative Coupling for C(sp²)—C(sp²) Bond Formation	
	N. Jha and M. Kapur	83
6	(Het)Arene/Alkene Cross-Dehydrogenative Coupling for C(sp²)—C(sp²) Bond Formation	
	C. Sambiagio and B. U. W. Maes	119
7	Alkene/Alkene Cross-Dehydrogenative Coupling for C(sp²)—C(sp²) Bond Formation	
	F. Kakiuchi and T. Kochi	153
8	Cross-Dehydrogenative Coupling Involving Aldehydes for C(sp²)—C(sp²) Bond Formation	
	T. Khandelia, S. Ghosh, and B. K. Patel	173
9	(Het)Arene/Alkane Cross-Dehydrogenative Coupling for C(sp²)—C(sp³) Bond Formation	
	T. Iwasaki and N. Kambe	201
10	Alkene/Alkane Cross-Dehydrogenative Coupling for C(sp²)—C(sp³) Bond Formation	
	W. Ali, S. Guin, and D. Maiti	229
11	Cross-Dehydrogenative Coupling for C(sp³)—C(sp³) Bond Formation	
	X. Li and Q. Song	297

12	Electrochemical C—C Bond Formation through Cross-Dehydrogenative Coupling V. Arun, S. K. Saha, and S. De Sarkar	361
13	C—C Bond Formation in Flow Systems Through Cross-Dehydrogenative Coupling G. M. Martins, R. C. Silva, G. C. Zimmer, T. J. Brocksom, and K. T. de Oliveira	385
14	C—C Bond Formation in Water through Cross-Dehydrogenative Coupling L. Adak, T. Ghosh, and B. C. Ranu	405
15	C—C Bond Formation through Cross-Dehydrogenative Coupling in Natural Product and API Synthesis T. Fukuta and M. Kanai	439
16	C—N Bond Formation through Cross-Dehydrogenative Coupling D. Chowdhury, M. Koner, and M. Baidya	469
17	C—O Bond Formation through Cross-Dehydrogenative Coupling H. Miyabe	493
18	Heteroatom—Heteroatom Bond Formation through Cross-Dehydrogenative Coupling T. Chen, C. Li, and L.-B. Han	521
19	Enantioselective Cross-Dehydrogenative Coupling A. M. Faisca Phillips, M. F. C. Guedes da Silva, and A. J. L. Pombeiro	551
	Author Index	621
	Abbreviations	643

Table of Contents

1	Introduction D. Maiti	
1	Introduction	1
2	Cross-Dehydrogenative Coupling: Development and Perspectives C.-Y. Huang, H. Kang, and C.-J. Li	
2	Cross-Dehydrogenative Coupling: Development and Perspectives	5
2.1	Diversity in CDC Reactions	6
2.2	Merging Chemical Techniques with CDC	9
2.3	Conclusions	12
3	Mechanistic Aspects of Transition-Metal-Catalyzed and Non-Transition-Metal-Mediated Cross-Dehydrogenative Coupling R. Logeswaran, N. Aravindan, and M. Jeganmohan	
3	Mechanistic Aspects of Transition-Metal-Catalyzed and Non-Transition-Metal-Mediated Cross-Dehydrogenative Coupling	15
3.1	Transition-Metal-Catalyzed Cross-Dehydrogenative Coupling	15
3.1.1	Transition-Metal-Catalyzed Cross-Dehydrogenative Coupling Involving C(sp ²)—H Bonds	16
3.1.2	Transition-Metal-Catalyzed Cross-Dehydrogenative Coupling Involving C(sp ³)—H Bonds Adjacent to a Nitrogen or Oxygen Atom	25
3.2	Non-Transition-Metal-Mediated Cross-Dehydrogenative Coupling	27
3.2.1	2,3-Dichloro-5,6-dicyanobenzo-1,4-quinone-Promoted Cross-Dehydrogenative Coupling	28
3.2.2	Hypervalent-Iodine-Mediated Cross-Dehydrogenative Coupling	30
3.2.3	Miscellaneous Non-Transition-Metal-Mediated Cross-Dehydrogenative Coupling	36
3.3	Conclusions	38

4	Cross-Dehydrogenative Coupling Involving Alkynes for C(sp²)–C(sp) Bond Formation J. Escudero and T. Besset	
4	Cross-Dehydrogenative Coupling Involving Alkynes for C(sp²)–C(sp) Bond Formation	41
4.1	Alkynylation of Arenes by Cross-Dehydrogenative Coupling	42
4.1.1	By Transition-Metal-Catalyzed C–H Bond Activation	42
4.1.1.1	Using Palladium Catalysis	42
4.1.1.2	Using Copper Catalysis	52
4.1.1.3	Using Iridium Catalysis	60
4.1.1.4	Using Nickel Catalysis	64
4.1.1.5	Using Gold Catalysis	66
4.1.1.6	Using Cobalt Catalysis	68
4.1.2	By Radical-Mediated Alkynylation	68
4.1.3	By Transition-Metal-Free Alkynylation	70
4.2	Alkynylation of Alkenes by Cross-Dehydrogenative Coupling	71
4.2.1	By Palladium(II)-Catalyzed Oxidative Heck-Type Coupling	71
4.2.2	By Cobalt(III)-Catalyzed C–H Bond Activation	73
4.3	Alkynylation of Carbonyl Derivatives by Cross-Dehydrogenative Coupling	73
4.3.1	By Tandem Nucleophilic Alkynylation/Oxidation Reactions Using Zinc Salts	73
4.3.2	By Tandem Nucleophilic Alkynylation/Oxidation Reactions Using Indium Salts	76
4.3.3	By Radical-Mediated Alkynylation	77
4.4	Conclusions	79
5	(Het)Arene/(Het)Arene Cross-Dehydrogenative Coupling for C(sp²)–C(sp²) Bond Formation N. Jha and M. Kapur	
5	(Het)Arene/(Het)Arene Cross-Dehydrogenative Coupling for C(sp²)–C(sp²) Bond Formation	83
5.1	Cross-Dehydrogenative Coupling between Het(Arenes) and (Het)Arenes through C–H Activation	83
5.1.1	Cross-Dehydrogenative Coupling between Two Arenecarboxylic Acids	83
5.1.2	Cross-Dehydrogenative Coupling between Benzamides and Halobenzenes	84
5.1.3	Cross-Dehydrogenative Coupling between 2-Arylacetamides, Benzamides, or <i>N</i> -Arylalkanamides and Arenes	85
5.1.4	Cross-Dehydrogenative Coupling of <i>N</i> -Pivaloylanilines with Substituted Arenes	87
5.1.5	Cross-Dehydrogenative Coupling of Phenol Derivatives with Hetarenes	90

5.1.6	Cross-Dehydrogenative Coupling of Benzaldehydes or Arenesulfonamides with (Het)Arenes	93
5.1.7	Cross-Dehydrogenative Coupling of Indole, Imidazole/ <i>N</i> -(Het)Arylimidazolium Salts, or [1,2,4]Triazolo[1,5- <i>a</i>]pyrimidine Derivatives with Hetarenes	97
5.1.8	Cross-Dehydrogenative Coupling of Benzazoles with Nitrogen-, Sulfur-, and Oxygen-Containing Azoles	101
5.1.9	Cross-Dehydrogenative Coupling of Pyridines and Pyridine <i>N</i> -Oxides	104
5.1.10	Cross-Dehydrogenative Coupling of Xanthenes, Indolines, or <i>N</i> -Nitrosoanilines with (Het)Arenes	107
5.1.11	Cross-Dehydrogenative Coupling of Sulfur-Containing Heterocycles with (Het)Arenes	109
5.1.11.1	Cross-Dehydrogenative Coupling of Sulfur-Containing Heterocycles with Benzimidates, Phenacylphosphoniums, Benzyl Thioethers, or Thiazoles	110
5.1.12	Cross-Dehydrogenative Coupling of Oxygen-Containing Heterocycles with (Het)Arenes	113
5.1.12.1	Cross-Dehydrogenative Coupling of Furans with Indoles or Arenes	113
5.2	Oxidative Cross-Dehydrogenative Coupling Induced by Single-Electron Transfer	115
5.3	Conclusions	116
6	(Het)Arene/Alkene Cross-Dehydrogenative Coupling for C(sp²)—C(sp²) Bond Formation C. Sambigao and B. U. W. Maes	
6	(Het)Arene/Alkene Cross-Dehydrogenative Coupling for C(sp²)—C(sp²) Bond Formation	119
6.1	Metal-Catalyzed Non-Directed Alkenylation	122
6.1.1	Ligand-Free Alkenylation	122
6.1.2	Ligand-Accelerated Alkenylations	126
6.2	Metal-Catalyzed, Coordinating-Group-Directed Alkenylation	133
6.2.1	<i>ortho</i> -Directed Alkenylation	134
6.2.2	<i>meta</i> - and <i>para</i> -Directed Alkenylation	139
6.3	Metal-Free Methods	144
6.3.1	Single-Electron-Transfer Methods	144
6.3.2	Electrophilic Alkene Activation	147
6.4	Conclusions	149

7	Alkene/Alkene Cross-Dehydrogenative Coupling for C(sp²)—C(sp²) Bond Formation F. Kakiuchi and T. Kochi	
7	Alkene/Alkene Cross-Dehydrogenative Coupling for C(sp²)—C(sp²) Bond Formation	153
7.1	Reactions of Electron-Rich Alkenes with Unactivated Alkenes	153
7.2	Reactions of Electron-Deficient Alkenes with Unactivated Alkenes	155
7.3	Reactions of Electron-Rich Alkenes with Electron-Deficient Alkenes	163
7.4	Reactions between Two Electron-Deficient Alkenes	167
7.5	Reactions between Two Unactivated Alkenes	169
7.6	Conclusions	170
8	Cross-Dehydrogenative Coupling Involving Aldehydes for C(sp²)—C(sp²) Bond Formation T. Khandelia, S. Ghosh, and B. K. Patel	
8	Cross-Dehydrogenative Coupling Involving Aldehydes for C(sp²)—C(sp²) Bond Formation	173
8.1	Metal-Free Coupling of Aldehydes with C(sp ²)—H Substrates	173
8.2	Metal-Catalyzed Cross-Dehydrogenative Coupling of Aldehydes with C(sp ²)—H Substrates	177
8.3	Dual Metal/Metal-Free Photoredox Catalysis for Coupling of Aldehydes with C(sp ²)—H Substrates	191
8.4	Conclusions	198
9	(Het)Arene/Alkane Cross-Dehydrogenative Coupling for C(sp²)—C(sp³) Bond Formation T. Iwasaki and N. Kambe	
9	(Het)Arene/Alkane Cross-Dehydrogenative Coupling for C(sp²)—C(sp³) Bond Formation	201
9.1	Alkylation of Benzene Analogues	201
9.1.1	Arenes with Directing Groups	201
9.1.2	Arenes without Directing Groups	205
9.1.3	Polyfluoroarenes	207
9.2	Alkylation of N-Heterocycles	208
9.2.1	Pyridines	208
9.2.2	Quinolines	212
9.2.3	Isoquinolines	213

9.2.4	Indoles	215
9.2.5	Pyrroles	219
9.2.6	Benzimidazoles	220
9.2.7	Benzothiazoles and Benzoxazoles	220
9.2.8	Nucleosides	222
9.2.9	Other N-Heterocycles	222
9.3	Alkylation of O-Heterocycles	222
9.3.1	Coumarins	222
9.3.2	Chromones	223
9.3.3	Furans	224
9.4	Alkylation of S-Heterocycles	224
9.4.1	Thiophenes	224
9.4.2	Benzothiophenes	225
9.5	Conclusions	225
10	Alkene/Alkane Cross-Dehydrogenative Coupling for C(sp²)—C(sp³) Bond Formation W. Ali, S. Guin, and D. Maiti	
10	Alkene/Alkane Cross-Dehydrogenative Coupling for C(sp²)—C(sp³) Bond Formation	229
10.1	Directed C(sp ³)—H Alkenylation	230
10.1.1	Proximal C(sp ³)—H Alkenylation	230
10.1.2	Distal C(sp ³)—H Alkenylation	244
10.2	Nondirected C(sp ³)—H Alkenylation	263
10.2.1	Metal-Assisted C(sp ³)—H Alkenylation	263
10.2.2	Metal-Free C(sp ³)—H Alkenylation	286
10.3	Conclusions	292
11	Cross-Dehydrogenative Coupling for C(sp³)—C(sp³) Bond Formation X. Li and Q. Song	
11	Cross-Dehydrogenative Coupling for C(sp³)—C(sp³) Bond Formation	297
11.1	Non-Enantioselective CDC Reactions	297
11.1.1	Reactions of C(sp ³)—H Bonds Adjacent to Nitrogen	297
11.1.1.1	Transition-Metal-Catalyzed CDC Reactions Involving C(sp ³)—H Bonds Adjacent to Nitrogen	298
11.1.1.2	Photocatalyst-Promoted CDC Reactions Involving C(sp ³)—H Bonds Adjacent to Nitrogen	307

11.1.1.3	Electrochemical CDC Reactions Involving C(sp ³)—H Bonds Adjacent to Nitrogen	310
11.1.2	Reactions of C(sp ³)—H Bonds Adjacent to Oxygen	311
11.1.2.1	Transition-Metal-Catalyzed CDC Reactions Involving C(sp ³)—H Bonds Adjacent to Oxygen	311
11.1.3	Reactions of Allylic and Benzylic C(sp ³)—H Bonds	315
11.1.3.1	Transition-Metal-Catalyzed CDC Reactions Involving Allylic and Benzylic C(sp ³)—H Bonds	315
11.1.3.2	Electrochemical CDC Reactions Involving Allylic and Benzylic C(sp ³)—H Bonds	321
11.1.4	Reactions of C(sp ³)—H Bonds in Alkanes	322
11.1.5	Non-Metal-Catalyzed CDC Reactions	324
11.1.5.1	Oxidant-Promoted CDC Reactions	324
11.1.5.2	Organocatalytic CDC Reactions	332
11.1.5.3	Brønsted Acid Catalyzed CDC Reactions	334
11.1.5.4	Visible-Light-Mediated CDC Reactions	335
11.2	Enantioselective CDC Reactions	336
11.2.1	Transition-Metal-Catalyzed Enantioselective CDC Reactions	336
11.2.1.1	Copper-Catalyzed Enantioselective CDC Reactions	336
11.2.1.2	Palladium-Catalyzed Enantioselective CDC Reactions	340
11.2.1.3	Nickel-Catalyzed Enantioselective CDC Reactions	341
11.2.2	Organocatalytic Enantioselective CDC Reactions	343
11.2.3	Visible-Light-Mediated Enantioselective CDC Reactions	351
11.2.4	Electrochemical Enantioselective CDC Reactions	355
11.3	Conclusions	357
12	Electrochemical C—C Bond Formation through Cross-Dehydrogenative Coupling V. Arun, S. K. Saha, and S. De Sarkar	
12	Electrochemical C—C Bond Formation through Cross-Dehydrogenative Coupling	361
12.1	C(sp ²)—C(sp ²) Bond Formation	362
12.1.1	Intramolecular Coupling	362
12.1.2	Intermolecular Coupling	365
12.2	C(sp ²)—C(sp ³) Bond Formation	373
12.2.1	Intramolecular Coupling	373
12.2.2	Intermolecular Coupling	376

12.3	C(sp ³)—C(sp ³) Bond Formation	379
12.3.1	Intermolecular Coupling	379
12.4	Conclusions	382
13	C—C Bond Formation in Flow Systems through Cross-Dehydrogenative Coupling G. M. Martins, R. C. Silva, G. C. Zimmer, T. J. Brocksom, and K. T. de Oliveira	
13	C—C Bond Formation in Flow Systems through Cross-Dehydrogenative Coupling	385
13.1	General Methods for Cross-Dehydrogenative Coupling under Continuous-Flow Conditions	386
13.2	Cross-Dehydrogenative Coupling under Continuous-Photoflow Conditions ..	393
13.3	Cross-Dehydrogenative Coupling under Continuous-Electroflow Conditions ·	399
13.4	Conclusions	402
14	C—C Bond Formation in Water through Cross-Dehydrogenative Coupling L. Adak, T. Ghosh, and B. C. Ranu	
14	C—C Bond Formation in Water through Cross-Dehydrogenative Coupling	405
14.1	Cross-Dehydrogenative Coupling in Water for C(sp ³)—C(sp ³) Bond Formation	406
14.2	Cross-Dehydrogenative Coupling in Water for C(sp ³)—C(sp ²) Bond Formation	414
14.3	Cross-Dehydrogenative Coupling in Water for C(sp ³)—C(sp)/C(sp ²)—C(sp ²) Bond Formation	426
14.4	Conclusions	435
15	C—C Bond Formation through Cross-Dehydrogenative Coupling in Natural Product and API Synthesis T. Fukuta and M. Kanai	
15	C—C Bond Formation through Cross-Dehydrogenative Coupling in Natural Product and API Synthesis	439
15.1	Cross-Dehydrogenative Coupling Involving C(sp ²)—C(sp ²) Bond Formation ...	439
15.1.1	Fujiwara–Moritani Reaction	439
15.1.2	Palladium-Catalyzed Cross-Dehydrogenative Coupling between (Het)Arenes	448
15.1.3	Miscellaneous Examples of Cross-Dehydrogenative Coupling Involving C(sp ²)—C(sp ²) Bond Formation	452

15.2	Cross-Dehydrogenative Coupling Involving C(sp ²)—C(sp ³) Bond Formation ...	456
15.2.1	Friedel–Crafts-Type Cross-Dehydrogenative Coupling	456
15.2.2	Minisci-Type Cross-Dehydrogenative Coupling	462
15.3	Cross-Dehydrogenative Coupling Involving C(sp ³)—C(sp ³) Bond Formation ...	465
15.3.1	Enolate Coupling	465
15.4	Conclusions	467

16 C—N Bond Formation through Cross-Dehydrogenative Coupling

D. Chowdhury, M. Koner, and M. Baidya

16	C—N Bond Formation through Cross-Dehydrogenative Coupling	469
16.1	Transition-Metal-Catalyzed Cross-Dehydrogenative C—N Bond Formation	470
16.1.1	Palladium-Catalyzed Reactions	470
16.1.2	Copper-Catalyzed Reactions	471
16.1.3	Cobalt- and Nickel-Catalyzed Reactions	476
16.1.4	Ruthenium-Catalyzed Reactions	477
16.1.5	Iridium-Catalyzed Reactions	477
16.2	Visible-Light-Mediated Cross-Dehydrogenative C—N Bond Formation	478
16.2.1	Visible-Light-Mediated C—N Bond Formation via Addition of N-Centered Radicals to Hetarenes	479
16.2.2	Visible-Light-Mediated C—N Bond Formation via Addition of Nitrogen Nucleophiles	483
16.2.3	Visible-Light-Mediated C—N Bond Formation via Cross-Dehydrogenative Radical–Radical Reactions	488

17 C—O Bond Formation through Cross-Dehydrogenative Coupling

H. Miyabe

17	C—O Bond Formation through Cross-Dehydrogenative Coupling	493
17.1	Oxidative Functionalization of C(sp ³)—H Bonds	493
17.1.1	Metal-Catalyzed C—O Bond Formation	493
17.1.2	Photochemical C—O Bond Formation	496
17.1.3	Electrochemical C—O Bond Formation	498
17.1.4	Other Methods for C—O Bond Formation	499
17.2	Oxidative Functionalization of C(sp ²)—H Bonds	501
17.2.1	Oxidative Functionalization of Arenes	501
17.2.1.1	Metal-Catalyzed C—O Bond Formation	501
17.2.1.2	Photochemical C—O Bond Formation	504
17.2.1.3	Electrochemical C—O Bond Formation	506

17.2.1.4	Other Methods for C—O Bond Formation	507
17.2.2	Oxidative Functionalization of Alkenes	507
17.2.3	Oxidative Functionalization of Aldehydes	509
17.2.3.1	Metal-Catalyzed C—O Bond Formation	509
17.2.3.2	N-Heterocyclic Carbene Catalyzed C—O Bond Formation	512
17.2.4	Oxidative Functionalization of Imines	517
18	Heteroatom—Heteroatom Bond Formation through Cross-Dehydrogenative Coupling T. Chen, C. Li, and L.-B. Han	
18	Heteroatom—Heteroatom Bond Formation through Cross-Dehydrogenative Coupling	521
18.1	Phosphorus—Heteroatom Bond Formation	521
18.2	Sulfur—Heteroatom Bond Formation	534
18.3	Formation of Other Heteroatom—Heteroatom Bonds	545
18.4	Conclusions	546
19	Enantioselective Cross-Dehydrogenative Coupling A. M. Faisca Phillips, M. F. C. Guedes da Silva, and A. J. L. Pombeiro	
19	Enantioselective Cross-Dehydrogenative Coupling	551
19.1	Transition-Metal-Catalyzed Enantioselective Cross-Dehydrogenative Coupling	552
19.1.1	C—C Bond Formation	552
19.1.1.1	CDC Involving C(sp ³)—H Bonds α to Nitrogen	552
19.1.1.2	CDC Involving C(sp ³)—H Bonds α to Oxygen	557
19.1.1.3	CDC Involving a Benzylic C(sp ³)—H Bond	561
19.1.1.4	CDC Involving Two C(sp ²)—H Bonds	564
19.1.2	C—O Bond Formation	574
19.2	Dual Metal/Organocatalyst Systems for Enantioselective Catalysis in Cross-Dehydrogenative Coupling	576
19.2.1	C—C Bond Formation	576
19.2.1.1	CDC Involving C(sp ³)—H Bonds	576
19.2.1.2	C(sp ²)—C(sp ²) and C(sp ²)—C(sp) Bond Formation	583
19.2.2	C—N Bond Formation	585
19.3	Organocatalytic Enantioselective Cross-Dehydrogenative Coupling	588
19.3.1	Amine Catalysis	588
19.3.2	Hydrogen-Bonding Catalysis with Dual Thiourea/Tertiary Amine Catalysts ...	599
19.3.3	Chiral Phosphoric Acid Catalysis	601

19.4	Photoredox-Catalyzed Enantioselective Cross-Dehydrogenative Coupling	607
19.5	Electrochemical Enantioselective Cross-Dehydrogenative Coupling	615
19.6	Conclusions	617
