

Contents

Introduction	1
I. Elements of the Mathematical Formulation of the Quantum Theory	18
I.1 States, Operators in Quantum Communication	18
I.2 Representations	30
I.3 Coherent Receiver Operators	47
I.4 Measurement Processes	53
I.5 References	60
II. Performance Criteria: Detection, Information	63
II.1 Classical Formulation	63
II.2 Quantum Expressions	84
II.3 References	111
III. Direct Detection Processing	114
III.1 Random Point Processes Theory	115
III.2 Detection Performance	143
III.3 Information Performance	156
III.4 References	173
IV. Phase Operator	177
IV.1 Some Models	178
IV.2 References	191
Conclusion	193
