

Contents

1	Developments in Socio-Economic Statistics	1
1.1	Stating the Problem	1
1.2	The Anglo-American Influence	1
1.3	Socio-Economic Statistics and Decision Theory	4
1.4	Misconceptions in Socio-Economic Statistics	5
1.5	Symptomatic Omissions	7
1.6	Recommendations for the Future	8
1.6.1	Beyond Sampling and Inference	8
1.6.2	Shifts in Emphasis	9
1.6.3	Filling Voids	10
1.6.4	Toward a De-centralized Understanding of Data	11
	Notes	12
2	From the Facts in Society to Socio-Economic Data	19
2.1	Socio-Economic Phenomena – The Starting and End Point of Statistics	19
2.1.1	Flaws in the Perception of Socio-Economic Reality	19
2.2	The ‘Projecting Agents’ of Socio-Economic Phenomena	21
2.2.1	Different Types of ‘Real-Life-Objects’	22
2.2.2	Substance and Individuality of ‘Real-Life-Objects’	22
2.2.3	Life Span and Timing of ‘Real-life-Objects’	24
2.2.4	Location, Extension and Mobility of ‘Real-Life-Objects’	24
2.2.5	Attributes and Variables	25
2.3	From ‘Real-Life-Object’ to ‘Statistical-Counting-Unit’	26
2.3.1	Surveying the ‘Real-Life-Objects’	27
2.3.2	The ‘Statistical-Counting-Units’	28
	Notes	30
3	Structure and Nature of Socio-Economic Data: The Aggregates	35
3.1	The Tri-Dimensional Frame of an Aggregate	35
3.2	The Nature of Socio-Economic Statistical Aggregates	40
3.3	The Interpretation of Aggregates	43

3.4	Tabular Presentation of Aggregates	45
	Notes	48
4	Ratios in the Social Sciences	51
4.1	Why Discuss Ratios?	51
4.2	Classifications of Ratios	51
4.2.1	Ratios Classified by Their Purpose	52
4.2.2	Ratios Classified by Closeness of (N) and (D)	52
4.3	The Interpretation of Ratios	54
4.4	Ratios Between Ratios	58
4.5	Other Kinds of Statistical Materials	60
	Notes	60
5	Interpreting Longitudinal Data, Part 1 – Looking to the Past	63
5.1	Nature and Purpose of Socio-Economic Time-Series	63
5.2	Types of Time-Series	64
5.2.1	Time-Series of Data with the Time-Dimension Aggregated	64
5.2.2	Time-Series of Inventories and Censuses	67
5.3	The Problem of (Dis-)Continuity	68
5.4	A Critical Look at the Basic Model of a Time-Series	69
5.4.1	The Secular Trend	69
5.4.2	Seasonal Fluctuations	71
5.4.3	Random Fluctuations	73
5.4.4	The Business Cycle	74
5.5	A More Germane Approach to Socio-Economic Time-Series	74
5.5.1	Editing as a First Step of Preparation	76
5.5.2	Relating Data of Regrouped Geographic Areas	77
5.5.3	Relating Data of Re-grouped Socio-Economic Activities	79
5.5.4	Relating Data Grouped in Time-Intervals of Different Lengths	80
5.5.5	Concluding Observations on Time-Series	82
	Notes	82
6	Longitudinal Analysis, Part 2 – Looking to the Future	87
6.1	The Forecaster and the Past	87
6.2	Statistical Obsolescence, Its Causes and Measurement	88
6.3	Obsolescence and Size of the Aggregate	94
6.4	Some Conclusions	95
	Notes	97
7	Longitudinal Analysis, Part 3 – Index Numbers	101
7.1	The Measurement of Prices	101
7.1.1	Introductory Observations	101
7.1.2	A (Very) Brief History of Price Statistics	102

7.1.3	Statistical Price Collection and Market Reality	103
7.1.4	What Really Is 'Price'?	104
7.1.5	The Price Aggregates	106
7.1.6	How Changes in Price Levels Ought to Be Measured	107
7.1.7	Summing Up	110
7.2	Index Numbers of Quantities	111
7.2.1	Four Complementary Production Concepts	111
7.2.2	What Is Quantity?	115
7.2.3	The Role of Weights in Production-Index-Numbers	118
7.3	Measures of Factor Productivity	121
7.3.1	The Production Factor 'Labor'	122
7.3.2	Other Production Factors	122
Notes	124
8	Cross Sectional Analysis in One Dimension	139
8.1	Frequency Distributions in Perspective	139
8.2	Linking Cross-Sectional and Longitudinal Analysis	140
8.3	'Measurement' in Socio-Economic Statistics	142
8.4	Determining Class Intervals	143
8.5	Interpreting Frequency Distributions of Unequal Class-Intervals	146
8.6	Interpreting the Cumulative Frequency Distribution	150
8.7	Interpreting Measures of Location, Dispersion and Asymmetry	153
8.7.1	Measuring 'Central Tendency' and Location	153
8.7.2	Interpreting Measures of Dispersion	155
8.7.3	Interpreting Measures of Asymmetry	156
Notes	159
9	Cross Sectional Analysis in More Than One Dimension	165
9.1	The Case that Provoked the Re-interpretation of Regression	165
9.2	An Irreverent View of Least Squares	169
9.3	On Precision in Regression with Aggregate Data	171
9.4	Different Forms of Data Association in the Social Sciences	175
9.5	Suggestions for an Alternative Model	180
Notes	183
10	Socio-Economic Statistics and Probability	185
10.1	Introduction – The Big Picture	185
10.2	A Historic Perspective on Probability in the Social Sciences	186
10.3	What Really Is Probability in the Social Sciences?	187
10.4	Typical Misuses of Probability	190
10.5	Random Fluctuations	192
10.6	Some Other Misuses of Probability	193
10.7	Probability and Sampling	194
10.8	Misuses of 'Statistical Significance'	196
10.9	Toward a Stochastic Worldview?	198
Notes	198

11 The Interface Between Statistics and Accounting	209
11.1 Socio-Economic Statistics and Accounting	209
11.2 Areas Common to Statistics and Accounting	211
11.2.1 Common Areas that Are Recognized	211
11.2.2 Common Areas that Are Not Recognized	213
11.3 Concluding Observations on Statistics and Accounting	216
Notes	217
12 Socio-Economic Statistics and Geography	219
12.1 A First Assessment	219
12.2 Statistics in Geography	220
12.2.1 Using Statistical Data	220
12.2.2 Using Statistical Methods	222
12.3 Geography in Statistics	224
12.4 Differences Between Statistics and Geography	225
12.5 A Revised Assessment	226
Notes	226
Afterthoughts	229
Notes	232
A Appendix to Chapter 3	233
B Appendix to Chapter 5	237
C Appendix to Chapter 8	241
C.1 Comparing A_j with Other Measures of Asymmetry	243
Notes	245
D Appendix to Chapter 9	247
Notes	252
E Appendix to Chapter 10	253
E.1 Random Sampling and Sampling Distributions	253
E.2 Statistical Significance	254
E.3 Levels of Significance	256
E.4 Interpreting Statistical Significance	258
Notes	259
Index	261
