

Contents

I.	Introduction.	1
1.	History	1
2.	Aim of the Study	2
3.	Hemodynamic Principles of Cerebral Perfusion.	2
3.1.	Hemodynamics in Normal Blood Vessels	2
3.2.	Cerebral Perfusion and Autoregulation	3
4.	Hemodynamics in Cerebral Angiomas.	5
4.1.	Hemodynamics of Angioma Feeding Arteries.	5
4.2.	Hemodynamics in the Angioma	5
4.3.	Brain Perfusion and Angioma	5
4.4.	Hemodynamic Changes After Angioma Exclusion	6
II.	Animal Experiments	7
1.	Experimental Arteriovenous Fistulae	7
1.1.	The Fistula Models of Spetzler and of Scott	7
1.2.	Own Fistula Models	7
1.3.	Topics of Our Experimental Investigations	8
2.	Materials and Methods	9
2.1.	Anaesthesia	9
2.2.	Surgical Procedure	9
2.3.	Blood Pressure Measurements	9
2.4.	Electromagnetic Measurements of Flow Rate	9
2.5.	Dopplersonographic Measurements of Flow Velocity	10
2.6.	Measurements of Microcirculation (Laser Doppler)	10
2.7.	Angiography	10
3.	Results of the Fistula Models in Rats	10
3.1.	Direct AV Fistula (T-fistula)	10
3.1.1.	Electromagnetic Flow Measurements	10
3.1.2.	Intraoperative Doppler Sonography	12
3.1.3.	Blood Pressure	12
3.1.4.	Angiography	12
3.2.	Indirect AV Fistula (H-fistula)	13
3.2.1.	Electromagnetic Measurements	14
3.2.2.	Doppler Sonography	15
3.2.3.	Blood Pressure Measurements	15
3.2.4.	Angiography	16
3.2.5.	Long-term Experiments	16
3.2.6.	Autoregulation Experiments	18
4.	Results of Fistula Models in Cats	18
4.1.	Flow Rates and Blood Pressure in the H-fistula Model	19
4.2.	Dopplersonographic Measurements	20
4.3.	Measurements in Varying Fistula Flow	20

4.4. High Flow Velocities and Vessel Wall Vibrations	22
4.5. Autoregulation in Acute and Chronic H-fistulas	22
4.6. Measurements of Cortical Perfusion and Flow Rates	24
4.7. Blood-brain Barrier	28
5. Discussion and Summary of Animal Experiments	29
III. Angiography in Angioma Patients Before and After Surgery	33
1. Materials and Methods	33
2. Results	34
3. Discussion	35
4. Summary and Conclusion	36
IV. Transcranial Doppler Sonography in Angioma Patients	38
1. Introduction, Methods and Normal Values	38
1.1. Transcutaneous Recording Methods	38
1.2. Transcranial Doppler Sonography	39
1.3. Normal Values	42
1.4. Discussion (Normal Values)	43
2. Transcranial Doppler Sonography in Angioma Patients (Normocapnia)	45
2.1. Preoperative Recordings	45
2.1.1. Flow Characteristics of Angioma Supplying Arteries	45
2.1.2. Discrimination of Spastic and Angioma Feeding Arteries	49
2.1.3. Transcranial dopplersonographic Recordings and Angiographical Vessel Diameter	49
2.1.4. Altered Blood Distribution and Steal Effects.	57
2.1.5. Compression Tests in Angiomas	57
2.1.6. Special Cases	58
2.1.7. Flow Characteristics of Angioma Veins	60
2.1.8. Flow Characteristics of Cerebral Arteries	60
2.2. Postoperative Recordings in Angioma Patients	60
2.2.1. Flow Characteristics in Former Angioma Feeders	60
2.2.2. Flow Characteristics in Neighboring Brain Arteries After AVM Removal	74
2.2.3. Special Case With Early Hemorrhage After Surgery	74
2.3. Discussion	77
2.4. Summary	79
3. CO ₂ Reactivity, Normal Values and Findings in Angioma Patients	79
3.1. Method	80
3.2. Terminology	82
3.3. Normal Values	82
3.4. CO ₂ Reactivity in Angioma Patients	87
3.5. CO ₂ Reactivity of Brain Arteries in the Angiogram.	93
3.6. CO ₂ Reactivity After AVM Removal	94
3.7. CO ₂ Reactivity Before and After Partial Embolization.	96
3.8. Special Cases	96
3.9. Discussion	101
V. Intraoperative Studies in Angioma Patients	109
1. Intraoperative Methods (History)	109
2. Topics of Our Intraoperative Measurements.	110
3. Methods Used in This Study	110
3.1. Microvascular Intraoperative Doppler Sonography	110
3.2. Electromagnetic Measurements of Flow Rate.	110
3.3. Intravasal Pressure Measurements	110

4. Operative Strategy and Preparation of Vessels to Be Measured	111
5. Measurements Before AVM Removal	111
5.1. Doppler Sonography Before AVM Removal	112
5.2. Electromagnetic Measurements of Flow Rate.	112
5.3. Intravascular Pressure Measurements	112
6. Measurements After AVM Removal	113
6.1. Doppler Sonography After AVM Removal	113
6.2. Intravascular Pressure Measurements After AVM Removal	115
6.3. Electromagnetic Measurements	117
7. CO ₂ Reactivity of Vessels Supplying Angioma and Brain Before and After AVM Exclusion .	117
7.1. CO ₂ Reactivity Before AVM Removal	119
7.2. CO ₂ Reactivity After AVM Removal	119
8. Discussion	122
9. Summary of Intraoperative Measurements	125
VI. Final Conclusions	126
